

DevOps Engineer (f/m)

As of now we are looking for a highly motivated member to boost TeleClinic. Our goal is simple: Revolutionize the way people experience healthcare!

BACKGROUND

E-Health in Germany is a fast-growing market with a lot of potential for creative ideas and start-ups. TeleClinic is an e-health pioneer and is the leading platform for online medical consultation in Germany. Thousands of patients can use TeleClinic free of charge.

Revolutionize together with us one of the most exciting markets in Germany!

YOUR CHALLENGES

As a DevOps Engineer at TeleClinic you are setting up and maintaining the services needed for smooth operations of our daily business. You are responsible for our servers that they are always up and running.

More in detail your tasks will be:

- Installing and nurturing of internal software and integration of new components into existing systems
- Constantly improving our security and data protection processes
- Development of back-up strategy for our systems
- Carrying out stress tests
- Responsible for server administration and SSL certificates

KEY TECHNOLOGIES

- Linux (Ubuntu)
- Shell Scripting
- PostgreSQL

YOUR PROFILE

- You have a minimum of 3 years' experience as a DevOps Engineer
- You are a heavy user of Linux and its command-line tooling
- You have good knowledge of distributed applications
- You communicate with engineers and third party service providers at eye level (fluently in English)
- Python is more than just a snake to you and you believe that explicit is better than implicit

WHY JOIN TELECLINIC?

- Be part of a cross-functional and highly motivated team
- High responsibility right from the start
- Have the chance to make real impact
- Participate in tech conferences
- Great team events, free snacks & coffee!

YOU ARE THE PERFECT MATCH FOR THIS POSITION?

Please send your CV or Github profile to jobs@teleclinic.com
