

PUBLIC NOTICE :

Beginning Monday, March 23, the City of Loganville will halt all yard waste pickup until further notice.

Please note that our trash provider has issued a notice that trash pickup will be limited to what can fit inside the containers provided - no bulk items will be picked up until further notice. The statement below was issued by Advanced Disposal.

"Over the past few days, we have all seen the impact within our communities regarding the potential presence of COVID-19 virus. As this situation continues to evolve, all of us are assessing how to best keep ourselves and those around us healthy and safe.

"We remain committed to keeping our employees safe while continuing to service you without interruption. In the best interest of the health and well-being of our employees, we are asking the City of Loganville to suspend household bulk item service at this time and to refrain from extra garbage bags outside of the cart. These items may pose the biggest risk to our employees because the virus can survive on some objects from inside the home up to 72 hours or more.

"Essentially, we are asking that garbage collection will be cart contents only on a temporary basis. Normal bulk item service will resume when the CDC lowers the risk factors."
