

Strip Heaters

Argus Heating distributes the Tempco and Hotwatt ranges of US-made strip heaters throughout Australasia.

These are a competitively priced high-quality strip heater, ideal for providing a versatile, efficient and economical method of evenly heating flat surfaces. Argus Heating will help to design a strip heater to suit your requirements and application.

Applications

Typically used in:

- Plastic extruders
- Incubators
- Duct heating
- Vending machines
- Sealing equipment
- Cabinet heating
- Packaging equipment
- Testing equipment

Features

- Available in a wide range of sizes and configurations.
- Rugged, high emissivity and good thermal conductivity.
- Quality assembled resistance element ensures greater heater longevity.
- Available in many different terminations and lead configurations.
- Rapid heat transfer provided by optional fins.
- Suitable for sheath temperatures up to 300°C.
- Custom made to specific wattages and voltages.

Strip heaters are a versatile, efficient and economical method of evenly heating flat surfaces.

Construction

- Nickel-chrome resistance wire wound around mica or ceramic insulated.
- Steel sheath (optional stainless steel or aluminium).
- Fibreglass insulated leads.
- Stainless steel screw terminals.
- Optional ceramic terminal covers and insulators.
