

Laboratory Still Elements

Argus Heating design, manufacture, and distribute laboratory still elements, which provide excellent performance and many years of service. A large range of sizes and ratings can be custom made to suit your application.

Applications

Typically used in:

- Chemical laboratories
- Medical laboratories

Features

- Tough with extremely good heat shock resistance.
- Able to provide intermittent heating.
- Flexible power cord.
- Does not cause metal oxide contamination.
- Safely heats corrosive materials.
- Closed off rounded end, for leak prevention and ease of cleaning.
- Consistent heating through the full length of the hot zone.
- Custom made up to 2300W, 12 - 280V, and a length of 450 – 520mm.

Laboratory still elements provide excellent performance and many years of service.

Construction

- Quartz glass tube outer and inner.
- Resistance heating wire.
- 2-core 90°C PVC power cord.

Stock code	Size (mm)	Wattage (W)	Voltage (V)
QTE086	16 O.D. x 520 length	1800	230
