

IEC Plugs and Sockets

Argus Heating supplies IEC sockets and re-wireable plugs.

Replacement plugs and sockets for the old style 'sliding earth' plugs and sockets used on band heaters. The older sliding earth plugs and sockets have been illegal to import (or sell) since 2005. We can typically upgrade band heaters wider than 50mm by removing the old sliding earth sockets and fitting new IEC sockets. We can also supply re-wireable silicone plugs.

IEC sockets and re-wireable plugs are available to replace the old style 'sliding earth' plugs and sockets used on band heaters.

Applications

- Mica metal clad and ceramic insulated band heater power connections.

Features

- 15A current capacity.
- International IEC and DIN specifications.
- Possible to retro-fit to existing band heaters.

Construction

- Sockets are stainless steel with ceramic insulation.
- Plugs are silicone sheath cover over metal connectors.

Stock code	Description
ECPS04	Re-wireable IEC plug
ECPS09	Right angle re-wireable IEC plug
ECP22	SS socket box
