

## Heavy Duty Water Heaters

Argus Heating design, manufacture, and distribute heavy duty water heaters. These specialist elements are well suited to difficult heating conditions or where extended element life is required.

The large diameter legs allow for a low watt density resulting in reduced scale (lime) build-up, and lower element surface temperature as well as extending element life.

### Applications

Typically used to heat:

- Water in cylinders where an extended element life is required.
- Hard water. Scale (lime) build-up on the leg elements is reduced to prevent premature failure from occurring.

### Features

- Incoloy® 800 - a nickel alloy that is extremely resistant to corrosion and chemical attack
- Pressure tested to reduce the chance of leakage.

Heavy duty water heaters are suited to difficult heating conditions.

### Construction

- High quality components to maximise performance and extend the life of the element, using Incoloy® 800 sheaths with 11mm diameter.
- 1.25" or 2" BSP brass boss with M5 stud terminals.
- Thermostat tube fitted to 6kW WH6002-1 heater.
- Sealing washer and earthing screw.

Stock Code	BSP Boss Size	No. of Legs	Wattage (W)	Voltage (V)	Length (mm)
WH1501-1	1.25"	1	1500	230	340
WH2001-1	1.25"	2	2000	230	280
WH3001-1	1.25"	2	3000	230	340
WH6001-1	2"	3	6000	3 x 230	370
WH6002-1	2"	3	6000	3 x 230	370
