

Metal Drum Base Heaters

Argus Heating design, manufacture, and distribute a wide range of IBC and drum heaters.

Drum base heaters are specifically designed to reduce the viscosity of products or melt solids to a pourable temperature. The digital controller will maintain the required product temperature. If rapid heat up is required, and the contents will accept an additional heat source, a drum heating jacket, flexible silicone drum heater, or drum insulated jacket, can be used in conjunction with the metal drum base heater.

Applications

Typically used to heat:

- Greases
- Fats
- Adhesives
- Chemicals
- Fruit concentrates
- Oils
- Paints
- Coatings
- Inks

Features

- 550mm diameter base. Weight: 15kg.
- Manufactured and tested in accordance with AS/NZS 3100.
- 230V 50Hz supply 900W.
- Two-metre power cable with moulded 3-pin plug.
- Digital controller range: 0-120°C.

Construction

Rugged stainless steel, reliable silicone heater mat, and high density Rockwool insulation.

Stock code	Drum type (L)	Dimensions (mm)	Wattage (W)	Voltage (V)
DH100	200	550 dia x 100 high	900	230

Please contact Argus Heating to discuss your application and heating needs.

Metal drum base heater. Heater colour, cable and plug may vary.

Right: drum fitted on heater.
Far right: optional insulated jacket.
