

## Flexible Silicone Drum Heaters

Argus Heating design and manufacture a range of flexible silicone drum heaters suitable for use on 200 litre metal or plastic drums and 60 and 20 litre drums and pails.

Flexible silicone drum heaters are specifically designed to reduce the viscosity of products or melt solids so they can be poured. These can be used with other Argus Heating products such as a drum insulated jacket for greater heating efficiency and/or a drum base heater in situations where the drum and product will accept additional heat.

### Applications

Typically used to heat:

- Viscous fluid
- Grease
- Fats
- Paints
- Chemicals
- Fruit concentrates
- Inks
- Adhesives

### Features

- Tough, long-lasting, and resistant to oil and chemicals.
- Rapid heat-up due to direct contact with the drum, and are fitted with a pre-set thermostat set at 32°C, 42°C or 52°C.
- Additional over-temperature thermostat for safety.
- Manufactured and tested in accordance with AS/NZS 3100.

Flexible silicone drum heaters are specifically designed to reduce the viscosity of products or melt solids to a pourable temperature.

### Construction

- Made from high-quality fibreglass reinforced silicone sheeting.
- Fitted with a 2m power cord and 3-pin plug.
- Standard with eyelets and lacing rope. Over-spring toggles option available for the 200L metal drum model.
- Can be used with an Argus digital PID controller for precise temperature control.

Drum size (litre)	Stock code	Length (mm)	Width (mm)	Voltage (V)	Wattage (W)	Thermostat (°C)
20 (metal or plastic)	S346200A	870	150	230	200	32
60 (metal or plastic)	S461044A	1174	250	230	440	32
200 (metal or plastic)	S7112900	1800	300	230	900	42
200 (metal only)	S71101300E	1750	250	230	1300	52
200 (metal only with spring toggles)	S71101300	1800	250	230	1300	52
