

Moulded Silicone Rubber Heat Pads

Argus Heating design, manufacture, and distribute a range of silicone rubber heat pads.

These heat pads easily attach to a surface using high temperature RTV. They provide gentle heating in low temperature environments to eliminate moisture build-up in enclosures and cabinets, and will also prevent the freezing process when fitted to equipment. We can custom design and manufacture heat pads to suit your requirements.

Applications

Typically used to heat:

- Printers and 3D printers
- Anti-condensation
- Electric motors
- Paper storage cabinets
- Viscous liquids in small containers
- Switchboards
- Pumps
- Low temperature environments

Features

- Supplies localised heat in an enclosure or to equipment and not the environment.
- Provides low-cost heating for a variety of applications.
- Low initial purchase cost, simple to install, and very inexpensive to run.

Moulded silicone rubber heat pads. 1. 50mm x 25mm, 2. 150mm x 75mm, 3. 225mm x 75mm, 4. Thin silicone rubber heat pads – custom design.

Silicone heat pads provide gentle heating in low temperature environments to eliminate moisture build-up in enclosures and cabinets.

Construction

- Moulded heat-resistant red silicone with a flexible spiral wound element encased within the heat pad.
