

Tubular Heaters

Argus Heating's tubular heaters combine traditional design values and rugged construction with modern high quality materials. They are tough, long lasting, economical, versatile, and reliable.

Applications

Ideal for chilly and damp situations where an efficient heat source is required including:

- Factories
- Bedrooms
- Large Halls
- Airing cupboards
- Glasshouses and nurseries
- Wardrobes
- Churches
- Shops
- Dog kennels

Features

- Convection heating gently warms air as it passes over the tube, efficiently combating winter chills and dampness.
- Available in single, double, or triple-tier combinations and lengths ranging from 300 mm to 2.4 m long.
- A 1200 mm long single tier heater runs for nine hours on less than one unit of electricity.

Argus Heating's tubular heaters provide a versatile and economical solution for reducing chill and dampness.

- An external plug-in thermostat and timer can be purchased separately for use with the tubular heater (stock code: TD033).

Construction

- Steel tubes with powder coated (Hammerglaze Bronze colour) exterior.
- 1.2m PVC power cord and NZ/AUS plug.

Compliance

- Standards: AS/NZ60335.1:2002 and AS/NZ60335.2.30:2009.
- Certificate of Approval: NZ12/003.

Please contact Argus Heating to discuss your application and heating needs.

Wattage
