

Drum Insulated Jackets

Drum insulated jackets can be used in conjunction with many of the drum heaters in our range to reduce heat loss and improve efficiency.

Applications

Typically used for:

- Reducing heat loss or improving efficiency when used in conjunction with a heater.
- Reducing the time needed to heat the product to temperature.
- Allowing the product to reach a higher top temperature.

Features and benefits

- The polyurethane nylon fabric jacket is flame retardant and water resistant.
- Jackets wrap easily around the drum and are held together with a velcro strip.
- The insulated lid allows easy access for filling/dispensing.
- Superior needled polyester insulation ensures heat is retained inside the drum.
- Designed to suit 200 litre metal or plastic drums.
- The drum insulated jacket can be used with a flexible silicone drum heater or a base heater.

Drum insulated jackets wrap easily around the drum and are held together with a velcro strip. They come with a built-in insulated lid for easy access for filling/dispensing.

Construction

- Polyurethane nylon fabric with velcro strip.
