

## Pet Pads

Pet pads provide comforting warmth in your pet's bed, much like an electric blanket. They are typically used for pets that feel the cold, are elderly, newborn, unwell, or recovering from injury.

The Argus Heating pet pad is manufactured in New Zealand from high quality components and operates at a very low power output. Pet pads are simple, safe, and economical to use.

### Applications

Typically used for:

- Keeping domestic pets warm at home.
- Helping unwell and elderly animals recover in veterinary clinics and animal shelters.
- Gentle warmth for newborn animals at farms, zoos, and animal parks.

### Features and benefits

- Heavy duty vinyl exterior is durable and easy to wipe down.
- Low electrical output making the pet pad safe and economical to use.
- Durable heating cable.
- 12-month guarantee against faulty workmanship or defective materials.

### Construction

- Double insulated.
- One size: 330 mm x 530 mm.
- Heavy duty vinyl.
- Two metre power cord with moulded two-pin plug.
- 230V, 8W heat output and low power output flexible element.

Pet pads are typically used for pets that feel the cold, are elderly, new born, unwell, or recovering from injury. Made in New Zealand from high quality components.
