

## Video Transfers: Tape to DVD or Hard Drive (MP4)

**4 WEEKS**

For transfers to MP4 a blank hard drive must be supplied by the customer . Approximately 1 GB of storage is needed for each hour of video.

DVDs or digital files to hard disc can be made from VHS, s-VHS, VHS-c, 8mm video, hi-8 video, digital 8 video, mini-dv, mini DVD, SD cards and Betamax. (PAL Mini DV transfers are not available). Each tape transferred to DVD is a single chapter and has a separate chapter title that appears in the menu. Custom chapter titling is generally not offered, but can be provided. Chapter titles are limited to 18 characters. An additional fee may apply.

It is possible to put more than two hours onto a DVD, but the quality will suffer and the price will not be any less than utilizing more than one DVD to maximize quality.

DESCRIPTION OF SERVICE	PRICE DVD	PRICE MP4
Single tape or DVD to archival DVD - Up to 2 hours	\$36.00	\$36.00
Combined tapes and/or DVDs to archival DVD - Up to 2 hours*	\$50.00	
Extra DVD copy (not applicable to transfers to Hard Drive)**	\$15.00	

\*Video can be combined to a single DVD for up to 4 separate original tapes or DVDs only.

\*\*The extra copy price is only provided at the time of the initial order.

For future copies, the DVD made during the previous work must be supplied in order to make a copy.

Customers must sign off and take responsibility for any copyright material.

## Video Tape Repair

**4 WEEKS**

Most physically damaged video cassettes can be repaired or spliced. When repairing the actual tape, damaged portions must be removed.

If a tape requires a physical splice, it is highly recommended that it be copied to DVD or digital file (see above video transfer prices) and not played in a VCR. Splices made to video tapes are likely to create a head clog, meaning the VCR must be opened and cleaned.

DESCRIPTION OF SERVICE	PRICE
Splice video tape	20.00
Replace cassette shell (add to above price is necessary)	20.00
