

ACOUSTICAL CEILING & WALL PANELS

CARDINAL COMPLETE INTERIOR PANEL

When your space requires the highest possible noise absorption, Cardinal Complete wood fiber panels are the solution. These panels have an NRC of .85 to .95 and are ideal for areas like gymnasiums, multi purpose rooms, and shooting ranges. The panels have spacer strips already attached plus a layer of insulation to absorb more sound.

Cardinal Complete interior panels provide ease of installation, extra noise reduction and are available in square and beveled edge treatments. Beveled edge panels are recommended in any situation where two Cardinal Acoustics panels come in contact with each other.

CARDINAL COMPLETE INTERIOR PANELS SPECIFICATION DETAILS:

EDGE DETAIL	NRC	THICKNESS*	WIDTH	LENGTH	WEIGHT P/SF
Bevel/Bevel, Bevel/Square, Square/Square	.85	5/8"	23-3/4" or 48"	48" up to 96"	2.5
