Specifications

NZBC Protection from fire - Compliant

Ideal applications

- Indoor multi-sport areas
- Gymnasium
- Fitness cardio areas
- Badminton
- Basketball
- Volleyball
- Handball
- Indoor futsal

Key Product Benefits

- **STRENGTH AND DURABILITY**
Mondoflex II is a vulcanised rubber point elastic material with high point-load resistance, perfect for multi-purpose use.
- **EASY TO CLEAN AND MAINTAIN**
The solid rubber upper layer is easy to clean, with no special waxes or coatings required.
- **GREAT SHOCK ABSORPTION FOR INDOOR SPORTS**
Cross-linked elastic foam backing delivers great shock-absorption and performance compliant with EN 14904.
- **HYGIENIC AND ODOUR-FREE**
The non-porous surface is water resistant, so bacteria in perspiration never gets a foothold. This means there's no risk of hard-to-eliminate odours.
- **ENVIRONMENTALLY FRIENDLY**
Mondoflex II is a mix of synthetic, natural and factory-recycled rubber. It complies with VOC emission guidelines. At the end of its lifespan, it can be disposed of as urban solid waste.
- **LASTING GOOD LOOKS**
Mondoflex II provides a seamless and long lasting appearance, when installed without welded joints. No welding, combined with the material's natural elasticity means joints won't split if the floor settles or expands..
- **GREENGUARD CERTIFIED.**
