

MONDOFLEX

MONDOFLEX MULTI-PURPOSE GYMNASIUM SURFACE

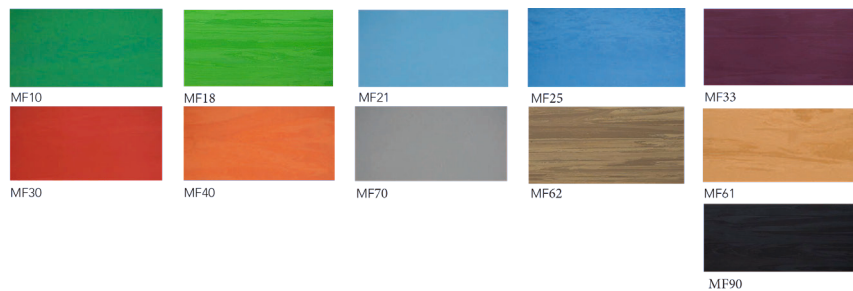

Product Description

Mondoflex is a tough, non-slip smooth rubber floor. Available in 2.5mm thickness and in roll format it is ideal for use in indoor multi-sport facilities, multi-purpose gymnasiums and basketball courts.

Colours

Mondoflex is available in a range of eleven fashionable colours with a tone on tone marbled effect.

Specifications

NZBC Protection from fire - Compliant

Ideal applications

- Indoor multi-sport areas
- Gymnasium
- Fitness cardio areas
- Badminton
- Basketball
- Volleyball
- Handball
- Indoor futsal

Key Product Benefits

- **STRENGTH AND DURABILITY**
Mondoflex is a vulcanised rubber point elastic material with high point-load resistance, perfect for multi-purpose use.
- **TIMELESS BIOMECHANICAL PROPERTIES**
The hardening process of the rubber is clearly superior to other materials and allows for the biomechanical quality of the floor to last longer.
- **EASY TO CLEAN AND MAINTAIN**
The solid rubber upper layer is easy to clean, with no special waxes or coatings required.
- **HYGIENIC AND ODOUR-FREE**
The non-porous surface is water resistant, so bacteria in perspiration never gets a foothold. This means there's no risk of hard-to-eliminate odours.
- **ENVIRONMENTALLY FRIENDLY**
Mondoflex is a mix of synthetic, natural and factory-recycled rubber. It complies with VOC emission guidelines. At the end of its lifespan, it can be disposed of as urban solid waste.
- **LASTING GOOD LOOKS**
Mondoflex provides a seamless and long lasting appearance, when installed without welded joints. No welding, combined with the material's natural elasticity means joints won't split if the floor settles or expands.
- **GREENGUARD CERTIFIED**
