

RAMFLEX FLOORING

RAMFLEX WEIGHT AND SKATE RESISTANT FLOORING

Product Description

Mondo Ramflex sports flooring is made from natural/synthetic calendared and vulcanised rubber.

Virtually indestructible with a hammered non-slip surface this rubber sports flooring solution is ideal for fitness centres, weights and cardio rooms, heavy weight equipment, ice arenas and indoor walkways.

Ramflex is available in two thicknesses of 6mm and 10mm in both roll and tile format.

Colours

Ramflex is available in a range of seven fashionable and functional colours that will blend into most environments. Some shades have a tone on tone marble and a new hammered effect to create texture.

Specifications

NZBC Protection from fire - Compliant

Ideal applications

- Gyms with heavy equipment
- Weight rooms
- Fitness and cardio rooms
- Indoor athletic stadiums
- Ice hockey arenas
- Ice rinks.

Key Product Benefits

- **STRENGTH AND DURABILITY**
Ramflex weight and skate resistant flooring is the strongest indoor sports flooring on the market. Ramflex is a vulcanised rubber material with a load bearing base, it is dent and tear resistant, withstanding the impact from heavy gym equipment, skates and spikes.
- **EASY TO CLEAN AND MAINTAIN**
The solid rubber upper layer is easy to clean, no special waxes or coatings required.
- **HYGIENIC AND ODOUR-FREE**
The non-porous surface is water resistant, so bacteria never gets a foothold. This means there is no risk of hard-to-eliminate odours.
- **ENVIRONMENTALLY FRIENDLY**
Ramflex is a mix of synthetic, natural and factory-recycled rubber. It complies with VOC emission guidelines. At the end of its lifespan, it can be disposed of as urban solid waste.
- **LASTING GOOD LOOKS**
Ramflex provides a seamless and long lasting appearance. No welding, combined with the material's natural elasticity means joints won't split if the floor settles or expands.
- **GREENGUARD CERTIFIED**
