

GEN+ STAIRLIFT

No better choice than the GEN+

FOR STRAIGHT STAIRCASES WITH NO CORNERS OR INTEGRAL LANDINGS

When it comes to straight and simple, there is no better choice than a GEN+ Stairlift. Save space and energy while providing passengers with a safe, reliable ride. It's easy to order, and simple to install.

The GEN+ features a single rail design and comes with a choice of Ergo or Standard seat, to deliver a tailored stairlift solution. Our GEN+ model features a weight limit of 320 lbs, together with a slimline seat and all the essential features to ensure a safe and comfortable ride.

A manually operated swivel allows you to safely turn to face the landing at the top of the stairs. The GEN+ rail can also incorporate a hinge so that when not in use, the lift will not obstruct any doorways or access routes in your home.

EASY INSTALLATION

With our qualified technicians, your GEN+ stairlift can be installed quickly and safely.

STRAIGHT AND SIMPLE

The rail is fixed to your stair treads, not the wall, ensuring there is no building mess or damage to your décor.

PEACE OF MIND

The GEN+ meets CSA-B613 B355-15, ASME 17.1, ASME 18.1 giving you the peace of mind!

Synonymous with comfort and reliability

These standard features come on every GEN+.
No extra cost, just great value!
