

AR-130

Home and Commercial Elevator

Thank you for considering Atlas for your next project. Our mission is to provide you with the highest-quality elevators on the market at a competitive price. With our expert advice, we will help you achieve your project's goals.

Traction Cables

750 lbs

24 fpm

Up to 40 feet

Even if you are only thinking of the viability of having an elevator in your home, public area or place of business, use this guide to help you design your future project. The AR-130 provides a footprint no larger than a well-placed closet. With this in mind, retrofitting the AR-130 into an existing home can be quite simple and straight forward.

Atlas manufactures and installs hundreds of elevators across North America. Whether you need elevators or any of our mobility and accessibility products, Atlas has the resources and knowhow to help you with any sized project.

A unique solution, designed for you.

A unique solution that can easily fit into your home, commercial or public place.

The Atlas AR-130 Model is equipped with a cable and drum mechanism, the quietest drive type available offering a comfortable run. The AR-130 also offers one of the smallest footprints in the industry. Unlike traditional elevators, the AR-130 does not require a machine room or external pump system. Installation is quick as the AR-130 is comprised of modular sections that drastically reduce installation time and means a standard retrofit takes as little as one day.

With its wide range of cab styles and designs the AR-130 uses quality material, wood finishes, and fixtures. Cabs can be custom-built with precision and beauty by our experienced craftsmen here in North America. Each step in the design process is guided by your choice of wood species, handrails, light fixtures, gates, and finishes.

QUIET

The AR-130 does not use hydraulics or vacuum systems. It is powered by a quiet electric drum and cable system. No machine room or external pump system required.

PREMIUM MATERIALS

Attention to detail is reflected in the choice of premium materials offer a finished and superior product.

FAST INSTALLATION

The AR-130 is comprised of modular sections that are easy to transport through and under doorways and ceilings drastically reducing installation time.

Hoistway

Whether you are building a home, designing a public or commercial place, or adding an elevator to an existing home, planning and installing an elevator can be overwhelming, particularly for builders new to the process.

Atlas's experienced team provide expert consultation to help you navigate the entire process from start to finish – from specification to framing, installation to inspection. Our goal is to make your elevator installation process as simple as possible. This includes manufacturing a cab that fits your specific hoistway measurements.

General technical information for an AR-130 same-side entry and exit a popular hoistway diagrammed to the left. This drawing is strictly for informational purposes only. For more information in standard and custom hoistways please speak with your sales representative or visit www.atlasaces.com/contact-us
