Dear Scott

The last 2 years YouthCARE has contracted Helium/Capture to do several development projects and communication projects.

The relationship between YouthCARE and Capture has always been one with high integrity and professionalism. The standard of work was never compromised.

The development team has worked tirelessly to meet our sometimes very short deadlines and always delivered. Our foundational interphase is an outstanding system, it is stable and very secure. This is the reason YouthCARE has decided to part ways with Capture as the system is of such a stable nature that we do not need continues fixes and maintenance – so for this we are forever grateful.

The people at Capture/Helium are easy to work with, they understand an organisation's needs and constraints that an organisation sometimes must work in. They are big picture thinkers, and this sometimes helps the client to take look further.

I highly recommend Capture/Helium as the working relationship we experienced has been great. I can only talk for YouthCARE but are very thankful for what they have delivered for us.

Kind regards

Liesl
