

MATISON

Lawful Interception

Matson is the complete Lawful Interception Mediation solution that will allow telecommunication service providers compliance to regulatory requirements of implementing the intercept solution according to international standards.

Our product line consolidates the requirement into these products:

- Matison Lawful Interception for Voice and Data services
- Matison Data Retention for telco services

Matson Lawful Interception

Matson Lawful Interception is the state of the art lawful interception solution that helps telecommunication service providers comply with regulatory requirements. It enables real-time interception of communication for all range of services like phone, messages and data in any service provider's environment. It supports all regulatory requirements with full compliancy to international standards.

HIGHLIGHTS

-  Complete LI mediation solution for service providers
-  Real-time interception of communication services
-  Compliant with regulatory requirements
-  Compliant with ETSI and 3GPP standards
-  Active and passive interception
-  Integrated with leading network equipment vendors

Matson Data Retention

Matson Data Retention is a comprehensive system for storage and inspection of historic data from telecommunication services. Integrated with Matison LI and service provider's network infrastructure it enables implementation of all requirements of ETSI LI DR specifications with significant cost reduction for telecommunication service provider.

-  Complete solution for inspection of historic data
-  Handles large amount of data
-  Web interface for data queries
-  Analyses network traffic for user specific data
-  Compliant with ETSI standards

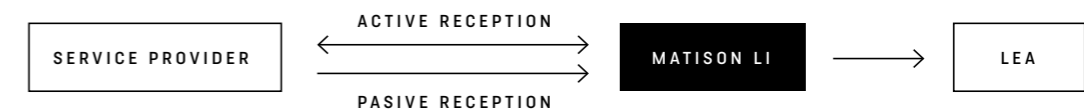

Real-time interception of communication services

Matson is a proven lawful interception mediation solution that helps telecommunication service providers comply with regulatory requirements by enabling real-time interception of communication for all range of services like phone calls, VOIP calls, VOLTE, SMS, MMS, e-mail, instant messaging and internet access. Any service provider's environment is supported, either fixed, mobile or cable thus ensuring minimum cost for the operator.

Matson is the preferred LI mediation solution, with its flexible modular design and distributed architecture provides unparalleled flexibility and scalability.

The solution is implemented following ETSI and 3GPP standards ensuring highest compliancy to LI regulatory requirements.

Matson is integrated with leading network equipment vendors and is versatile to interface any vendor through industry standard interfaces. It's capability for passive or active reception of network traffic enables processing and analysis in real time for full range of network throughput. Our team of experienced engineers are committed to ensure seamless integration to service providers network elements.

Deep dive into data

Matson DR — Lawful Intercept Data Retention is a system for inspection of historic data from telecommunication services and provides access to service providers information.

Any service provider's environment is supported, either fixed, mobile or cable, ensuring that all data is consolidated without added cost of implementing different systems for different environments. It

analyses and stores users data like subscriptions, usage from particular service, devices, access to network resources.

Matson DR system integrated with Matison LI and service provider's network infrastructure is capable to implement all requirements of ETSI LI DR specifications and will significantly cut costs of overall LI DR system implementation when both systems are deployed.

Matison Benefits

-  Low operational costs due to modular design and centralized administration
-  Fast time-to-market of new regulation requirements
-  Complete communication security end-to-end
-  Seamless integration into existing networks
-  Avoids HW vendor lock-in
-  Consolidating existing fixed and mobile LI systems

Contact us

Matison is a subsidiary of Sedam IT Ltd. Sedam IT is one of the leading ICT companies in Croatia delivering high quality solutions to its customers from 2003. As a Matison customer you benefit from the knowledge of our vast IT expertise. Our engineers are focused to ensure premier customer experience.
