

# REPUTATION AND REVIEWS

**Your reputation sells. People will likely look at online reputation before making purchasing decisions for a vast array of goods and services.**

Our goal is to offer you a complete automated system for monitoring reputation, capturing reviews through email, SMS, and your website, then automatically posting positive reviews to your website, Facebook, Google and more.

Our program offers monthly reporting, email and SMS templates, website widgets and a reporting dashboard. We start by listening, monitoring and reporting reviews. We provide the automation tools, over a 6 to 12-month period, for collecting positive review both by website, email and SMS text. We also have a special process for sorting out and alerting clients of negative reviews before they hit the internet. We make sure positive reviews hit the most influential engines like Google and Facebook.
