

Brain Road Map for Rounds

(Script for Interdisciplinary Communication)

Skipping any of these steps could leave the clinical team wanting more information!

Investigate (Ask these questions)	Report (only takes 10 seconds)
Where is the patient going?	Target level of consciousness (RASS, SAS)
Where is the patient now?	Actual level of consciousness (RASS, SAS) Delirium assessment (CAM-ICU, ICDSC)
How did they get there?	Drug exposures
