EDUCATION

Georgia Institute of Technology - 2021

MS Human-Computer Interaction (HCI)

Auburn University - 2019

B. Indd in Industrial Design

SKILLS

*I have experience working in both **Agile** and **Lean UX** teams and collaborating in systems like **Abstract** and **Jira**. I focus on **UX Design**, but recognize the value of being competent with **UX Research** methods. I enjoy **brainstorming** and **whiteboarding** concepts, and quickly testing my designs through various fidelities of **wireframes** and **prototypes** with users.*

Design

Adobe XD
Axure
Sketch + Invision
Adobe Creative Suite
CAD Modeling

Research

Contextual Inquiry
Interviews + Focus Groups
Surveys
Usability Testing
Google Analytics

I have worked with many different prototyping tools, design frameworks, and research methodologies but have listed my favorites here to avoid a laundry list.

RECOGNITION, PUBLICATIONS, AND SUCH

Design Strategies for Next Generation

Biocontainment Units: Creating Safer Spaces

Healthcare Design Magazine, 2020

DUIT: An Overdue Innovation on a Construction Essential

Core77, 2017

Designing Green Award

Auburn University, 2017

EXPERIENCE

Johnson & Johnson, Medical Devices — UX Design Intern

May 2020 - Present | Boston, MA

May - Aug 2018 | Cincinnati, OH

Leading product direction and identifying features for a remote rehabilitation mobile app designed to promote patient engagement during post-op recovery, including developing wireframes, interactive digital prototypes, and protocols for user testing.

Defined user needs and developed initial UX and UI concepts for intra-op robotic surgical system navigation and planning activities, regularly presenting to various teams of engineers and business stakeholders.

Project Aether — Master's Thesis

May 2020 - Present | Atlanta, GA

Exploring options to improve patient comprehension of, and access to, their diagnostic imaging results. Currently developing user and product requirements to ultimately serve as the foundation for a user-friendly digital platform that evolves with the patient throughout their care journey.

SimTigrate Design Lab — Researcher

May 2019 - May 2020 | Atlanta, GA

Regularly devised and conducted interviews and co-design sessions to understand healthcare professional needs related to safety and workflow with digital systems.

THRIVE — UX Designer

May - Aug 2019 | Atlanta, GA

Rapidly developed UI iterations and information display components to arrive at comprehensive digital product concept for Fortune 500 medical device client.

GE Appliances — Industrial Design intern

May 2017 - May 2018 | Louisville, KY

Collaborated with cross-functional business, engineering, and human factors teams to arrive at next generation UI through rapid prototyping, user testing, and iteration.

Site Lead — Humphreys & Associates Contractors

Nov 2011 - Aug 2014

Led team of 4 during end-to-end new construction operations, and was involved with resource and timeline planning, managing client expectations, and coordinating with interdisciplinary site leads to optimize the build out process.
