Why study English in the United Arab Emirates?

The U.A.E is one of the latest additions to the list of best places to study English. Located between the West and East, the U.A.E is a business, tourist and education hub that attracts millions of visitors every year and has 90% of its population made up of expats from 180 different nationalities. Thus, English is spoken by everybody and everywhere in the city as a common language.

Besides being exposed to Dubai's truly cosmopolitan environment and having the opportunity to practice English in different situations – from buying food at the supermarket to making new friends in a brunch and to having a business meeting in a Café -, students can also experience the city's modern infrastructure, premium lodging, security, several options of entertainment, sports, and recreation.

Students interested in developing their careers can take advantage of the U.A.E's diverse and dynamic business environment and find a job opportunity while developing their Language skills. There is also the possibility of acquiring an international qualification from one of the many reputed Universities hosted by Dubai.
