enCaption Wins Future Product Innovation Award, Presented by TV Technology

WASHINGTON — enCaption, a turn-key solution for providing around-the-clock generation of captioning on live or recorded programming, is a recipient of Future's Product Innovation Award presented by TV Technology. Future's Product Innovation Awards are evaluated by a panel of engineers and industry experts, and are selected based on innovation, feature set, cost efficiency and performance in serving the industry.

Winners receive an award for display and will be featured in TV Technology, the leading brand covering television and media technology. All nominated products are featured in the special Product Innovation Awards ebook which will be made available to more than 100,000 readers of Future's Business to Business brands.

The latest version includes a powerful video delay feature that enables lip-sync grade caption synchronization, as well as updates to its punctuation and speaker separation abilities. When used alongside enTranslate, enCaption can provide real-time translated captions in 46 different languages.

"The Future Product Innovation Awards are now in their seventh year," said Paul McLane, Future managing director content for media technology titles. "The program focuses attention on innovation, cost-effectiveness and reliability. We are proud to recognize such excellence in our industry."

About ENCO

Founded in 1983, ENCO pioneered the use of computer-based, digital audio and program automation for radio stations and TVstudios. The company has since evolved its product line to cross all aspects of today's automated broadcast and production workflows, including closed-captioning, visual radio, audio compliance, instant media payout, remote contribution, and cloud-based web streaming. Beyond its flagship DAD system, which brings the industry's best reliability, cost-efficiency and intuitive operation to automated radio operations worldwide, ENCO's enCaption solutions leverage patented, innovative technologies to optimize speed and accuracy in live closed captioning for TV and radio broadcasts. The company has also brought several of its broadcast and production environments to the professional AV industry, including enCaption for open captioning of meetings, lectures and events; and ClipFire and HotShot to support live video and audio payout for sports and events. ENCO is headquartered in Southfield, Michigan USA and retains a global distribution network, plus a growing network of partnerships with complementary industry vendors.
