

TENANT INTERNET

NUVO Network's internet connections ensure data is sent on a secure and dedicated **point-to-point connection** with the Toronto Internet Exchange at 151 Front Street, the largest **internet exchange in Canada**. NUVO Network's internet connection provides users with guaranteed speeds and security.

This connection ensures that customers avoid the typical carrier-to-carrier process employed by other commercial and residential ISPs in which data passes through multiple data centres searching for the best available route to its destination.

SHARED PLANS

Shared plans provide a private network that can be used to connect hardware devices such as printers, VOIP telephones, network-attached storage devices, switches, servers and other network-enabled devices otherwise not permitted on NUVO wireless. Tenants on this service plan can self-manage the network provided, or opt for a NUVO support service. This option is currently only available to our members leasing a private office that offers a wired connection into NUVO's infrastructure.

Plan Name	Connection Speed (Mbps)	Price/mo \$	Recommended Users
Individual	10	75	1 - 2
Small Team	50	120	3 - 7
Enterprise	100	225	8+

DEDICATED PLANS

Dedicated plans provide a private network that can be used to connect hardware devices such as printers, VOIP telephones, network-attached storage devices, switches, servers, and other network-enabled devices otherwise not permitted on NUVO wireless. Tenants on this service plan can self-manage the network provided, or opt for a NUVO support service. Users will experience a reliable, efficient, and secure service. This option is currently only available to our members leasing a private office that offers a wired connection into NUVO's infrastructure.

Plan Name	Connection Speed (Mbps)	Price/mo \$	Recommended Users
Individual	10	85	1 - 2
Small Team	50	320	3 - 7
Enterprise	100	575	8+
