

## HP36 Four Stage Ventilation Thermostat

- Simple to use ventilation control thermostat.
- Temperature monitored by single remote sensor.
- Temperature can be displayed in either °C or °F.
- Fans controlled over four sequential stages.
- Inbuilt cycle timer operating on first stage provides minimum ventilation with easily adjustable on and off times.
- Heating setpoint is relative to the ventilation setpoint, with a single output relay.
- Ideally suited to new installations and simple upgrades of existing 4 stage capillary thermostat systems.
- Supplied with:
  - 1x Temperature sensor.
- Available as:
  - Panel Mount.
  - Surface Mount.
