

INTERACTIVE STARTUP MAP: 24 ISRAELI STARTUPS THAT ARE CHANGING THE FUTURE OF MANUFACTURING

#II4WEEK2020

Industry 4.0 comprises of a wide range of technologies and solutions.

Therefore, when analyzing this sector, it is helpful to look at the performance of its different subsectors.

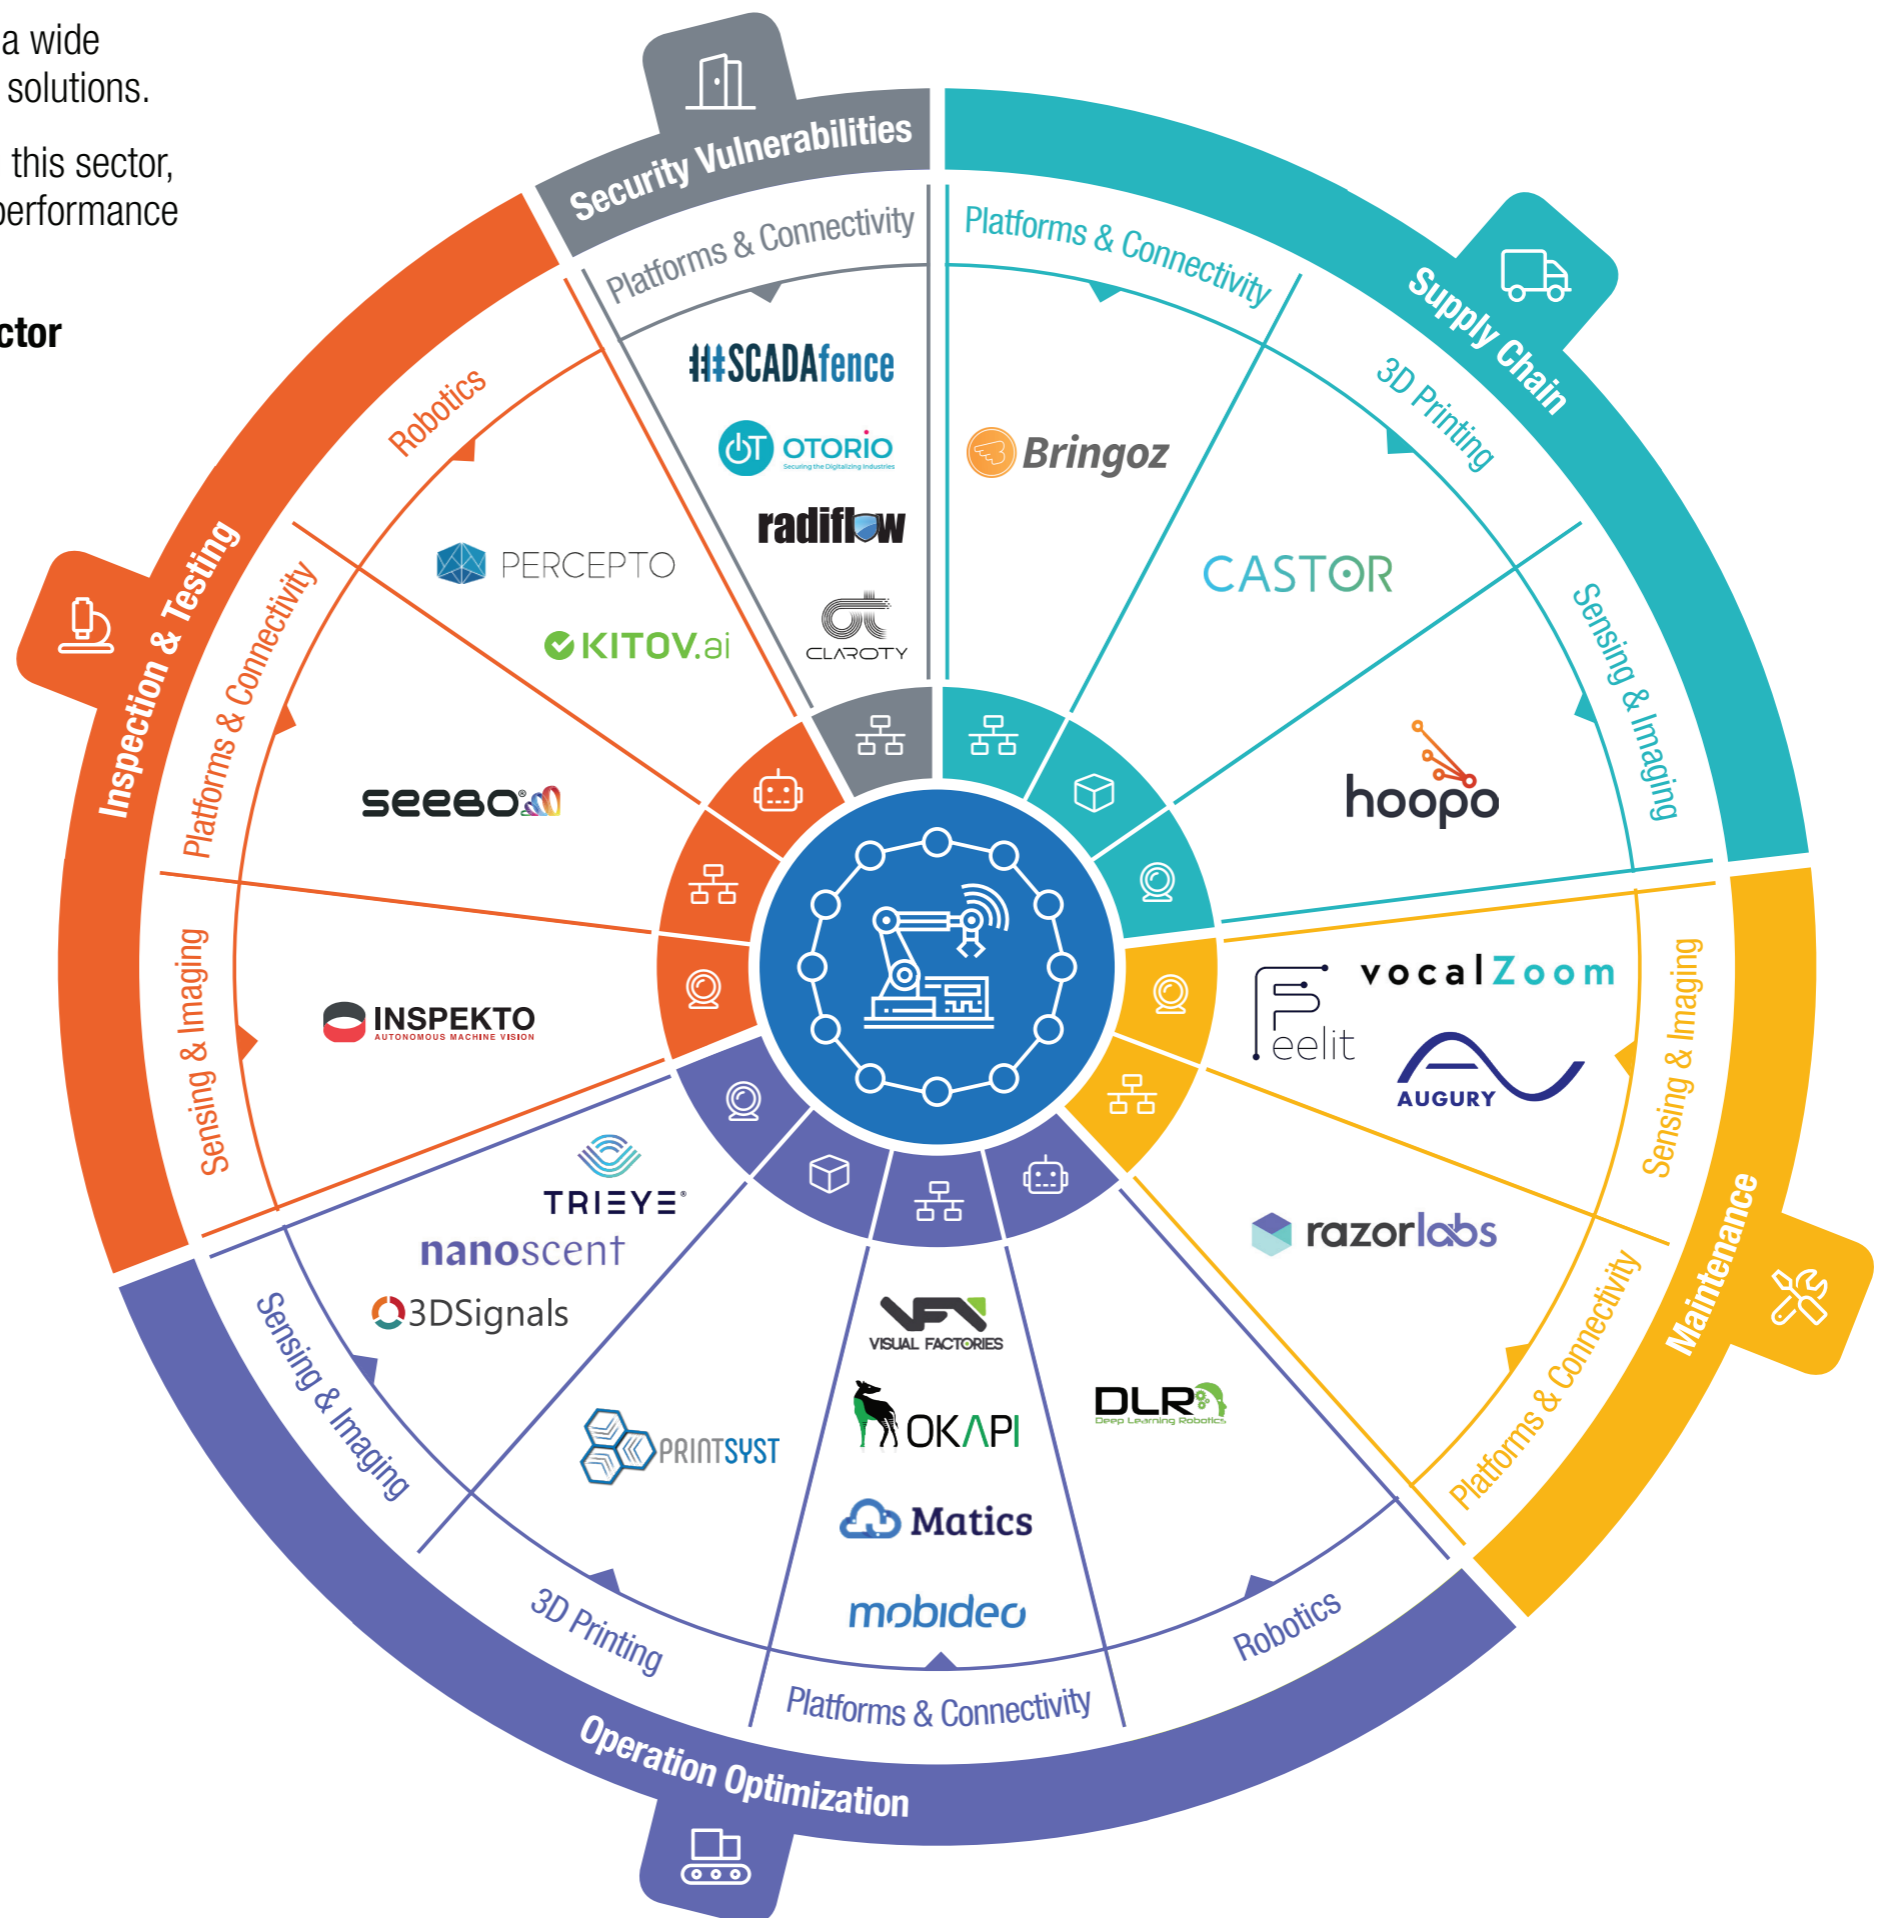

We have divided the sector into nine subsectors:

MANUFACTURING CHALLENGES:

-  **Operations Optimization**
-  **Maintenance**
-  **Supply Chain**
-  **Inspection & Testing**
-  **Security Vulnerabilities**

TECHNOLOGIES:

-  **IoT Platforms & Connectivity**
-  **Sensing & Imaging**
-  **Robotics**
-  **3D Printing**

Naturally, many companies fall into more than one category as they try to solve a few challenges with a specific technology or with a combination of several technologies. However, in this graph, we have divided the companies in a mutually exclusive way according to the main technologies and challenges that they solve.

The 24 startups in this graph will be joining us on February 25, 2020 at Israel Industry 4.0 Week to showcase their product.

Join them and over 400 other industry 4.0 professionals at the largest innovation week.
