

Verodin Job Posting – Director of Quality Assurance, Engineering

Who We Are

Verodin is reshaping how organizations measure, manage and improve cyber security effectiveness. Evangelizing a technology movement takes more than just a good sales pitch. As a team, we obsess over helping our customers:

- Assess their current state and expose true security gaps
- Establish a means to measure security effectiveness and demonstrate improvement over time
- Realize the maximum potential of existing security investments
- Raise the bar for the entire security organization

If you're passionate about security, have the core competencies outlined below and are looking to join a team on a mission, Verodin is the place for you.

The Team and The Role

The Verodin Engineering and Development team is at the core of bringing cutting edge technology to our customers with the Verodin Security Instrumentation Platform. Come be part of a fast-paced team that focuses on delivering solutions to the hardest problems in Information Security. The Engineering and Development team tackles a constantly evolving set of new challenges in a new market that we are defining.

The Verodin Team is currently seeking a Director of Quality Assurance to join the team at Verodin Headquarters in Virginia. Do you automate everything? Does the concept of doing the same task more than once grind away at you? Are details what you live for? If so, we are looking for a Director of Quality Assurance to lead the charge as a player-coach with the Security Instrumentation Platform and scale for the future.

Job responsibilities include:

- Leadership of the Quality Assurance function at Verodin as peer to other Development functional leaders.
- Establish new and refine existing processes, principles and mechanisms that create a measurable impact on the offering
- Hands-on test design and development for all aspects of the Verodin platform
- Metrics definition and reporting

Required qualifications include:

- 3+ years in Quality Assurance, with the last 1+ in a technical leadership role
- Strong background testing applications in Python and Ruby
- Significant experience in automating the testing of API-led applications
- Significant experience with test automation frameworks such as pytest, RSpec, Ghost Inspector or similar
- Strong networking background, with hands-on troubleshooting ability
- Experience with configuration management (Ansible, Puppet, Chef or similar)

Desired qualifications include:

- Significant experience with AWS, Azure or GCP
- Experience with container orchestration
- The ability to know when you're right *and* when you're wrong – as well as how to tactfully share those insights, improving the team
- Strong ability to “think on your feet”

To apply for this role, please send your CV/resume and a detailed cover letter describing why you're a fit to careers@verodin.com.

Verodin is an equal-opportunity employer.
