

NEURAFLASH™

Intelligent Solutions with Salesforce's Success Platform

Wave Analytics Cloud allows business users, analysts, admins, IT and developers to explore any data and discover the insights needed to drive results!

Analytics Cloud Flash Accelerators

As an accredited Analytics Cloud Partner, our Certified team will work closely with you and your organization over a several week engagement, understand your data, and your analytics objectives, and implement the most important capabilities of Wave Analytics to meet your initial needs. Your team will be able to drill down into datasets, get instant insights, and *create better outcomes for your business and your customers in a Flash!*

- ✓ Provide insights for your Business, Sales and Customer Service teams
- ✓ Explore your data on a desktop or your mobile device of choice
- ✓ Extract, transform and build compelling visual Dashboards from data external to Salesforce such as other BI, ERP or Big Data sources
- ✓ Drive better customer experiences and business outcomes

Flash Insights with Wave Apps from Salesforce *“Wave Apps from Salesforce help speed your organization’s time-to-value with Wave Analytics”.* NeuraFlash will quickly help you configure Service Wave or Sales Wave Dashboards, unlocking insights from your existing Salesforce data.

Flash Insights Plus with Wave Apps from Salesforce Our certified team will help you quickly configure Service Wave or Sales Wave Dashboards, then customize the Wave App to meet your business needs by expanding on top of the out of the box Dashboards per your Workflows & Processes.

Flash Insights Custom In partnership with your business team, BA’s and other executives we will understand your requirements and the insights your business needs, and design and implement dashboards in an iterative fashion on the Salesforce Analytics Cloud. By leveraging our deep Analytics knowledge with other platforms and technologies, we will provide an integrated Analytics solution by bringing data from other sources like ERP, Accounting, Contact Centers, marrying it with Salesforce data and deliver it on the Wave Analytics Platform.
