**Frank**Advice

We offer workshops that focus on overall team and organisational capability, policy skills, and various aspects of delivering better quality policy advice. You can choose from our workshop menu, or we can design bespoke courses to meet your specific policy quality and capability challenges.

### Overall capability to deliver great policy advice

#### Policy infrastructure

How fit for purpose is your policy team or organisation? What are the key components of an organisation that supports, enables, and incentivises great policy design?

### Policy skills and high-performing policy teams

#### Know your policy self: build your policy skills profile

What are your current policy skills? Where do you want to develop? What sort of policy role do you aspire to, and how are you going to get there?

### Top shops: build a high-performing policy team

What sort of policy team do you need to meet your current and future policy demands? What capability do you have currently? What new capabilities might you need? What do you need to grow or buy-in?

### Better quality policy

#### Deliver great advice

What does great policy advice look like? What systems, processes and tools do you need to produce it? What quality assurance processes do you need to ensure your policy outputs are top notch?

#### Evidence based policymaking

How can you put evidence at the heart of your advice by embedding evidence use in your organisation or team [and/or by establishing a dedicated analytics team]?

#### Build your Policy Toolkit

What tools and methods do policy advisors need to produce great policy advice? How do you know what method to apply to what policy challenge?

#### The policy value-chain

How is policy developed and delivered? How can we reframe policy to think of it as part of an integrated value chain – from demand to design to delivery and back again?

#### Effective policy writing for decision-makers

What does good policy writing look like? What needs to be considered? What do busy decision-makers need to help them take a decision?

We also offer several bespoke 1-day courses including:

Investing for wellbeing - bringing together the words and numbers to support wellbeing in line with Treasury's LSF Dashboard

Learn the basics of governing data

Learn the basics of being a Private Secretary

Learn the basics of drafting Ministerial and CE responses to stakeholders

belong.
