Methodology

The Top Family Law Firm rankings begin with a survey of over 100 firms serving wealthy clients in the UK. The key data of number of partners, number of fee earners, total number of staff, fee income and private client fee income as a percentage of total fee income is used to produce the rankings that are published on www.eprivateclient.com. In addition, the number of clients and the number of UK offices are also used to formulate the list. When data is not supplied, estimates based upon published data and PAM Insight's market knowledge are used.
