

# Repeating Patterns

**Lesson Structure and Resources:** Use the brick colours along with either symbols or numbers to create interesting and challenging patterns. Help your learners identify interesting concepts like odd/even patterns.

## 1 Finish off the patterns

### Guidance

Start with a simple pattern and gradually increase the complexity. Children can also create patterns for their friends to finish.

*"Can you introduce a third colour?"*

*"How many blue bricks do we need if we have 12 bricks altogether?"*
