

Key Stage: Two

Topic: Digestive system

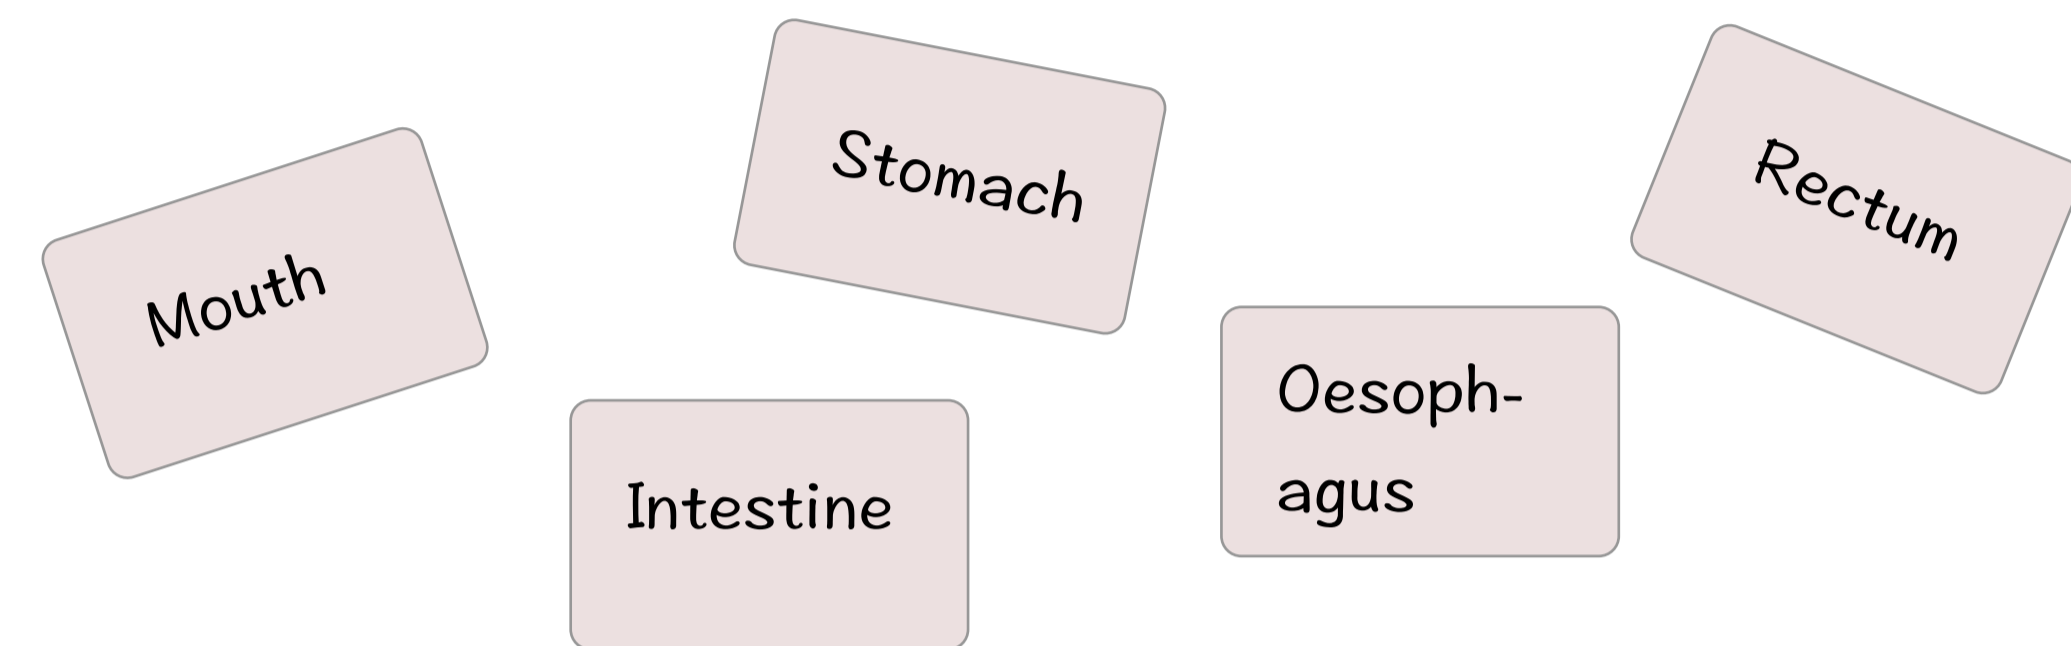

Lesson Objective: This learning sequence will help children write a comprehensive explanation of how our digestive system works.

1 Identify

- List the information to be used.

Guidance

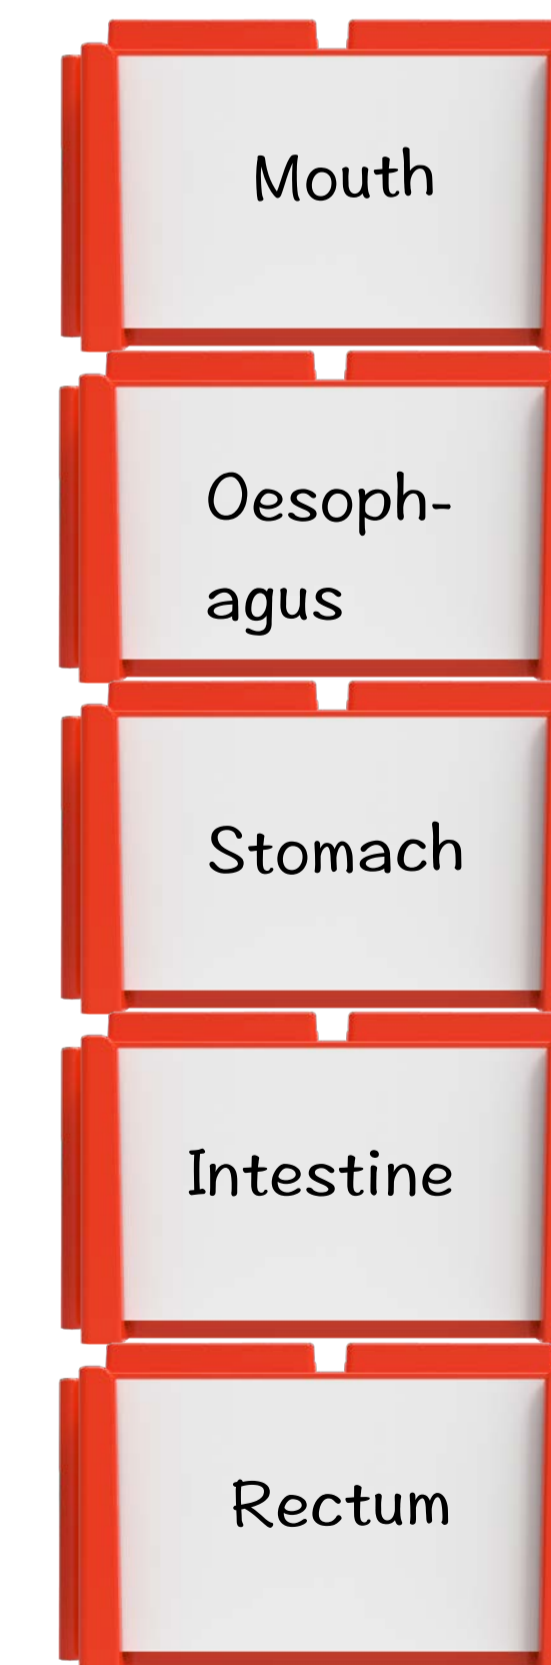

Children **identify** all of the parts of the digestive system.

2 Sequence

Order by time or logic.

The digestive events can now be ordered **sequentially**.

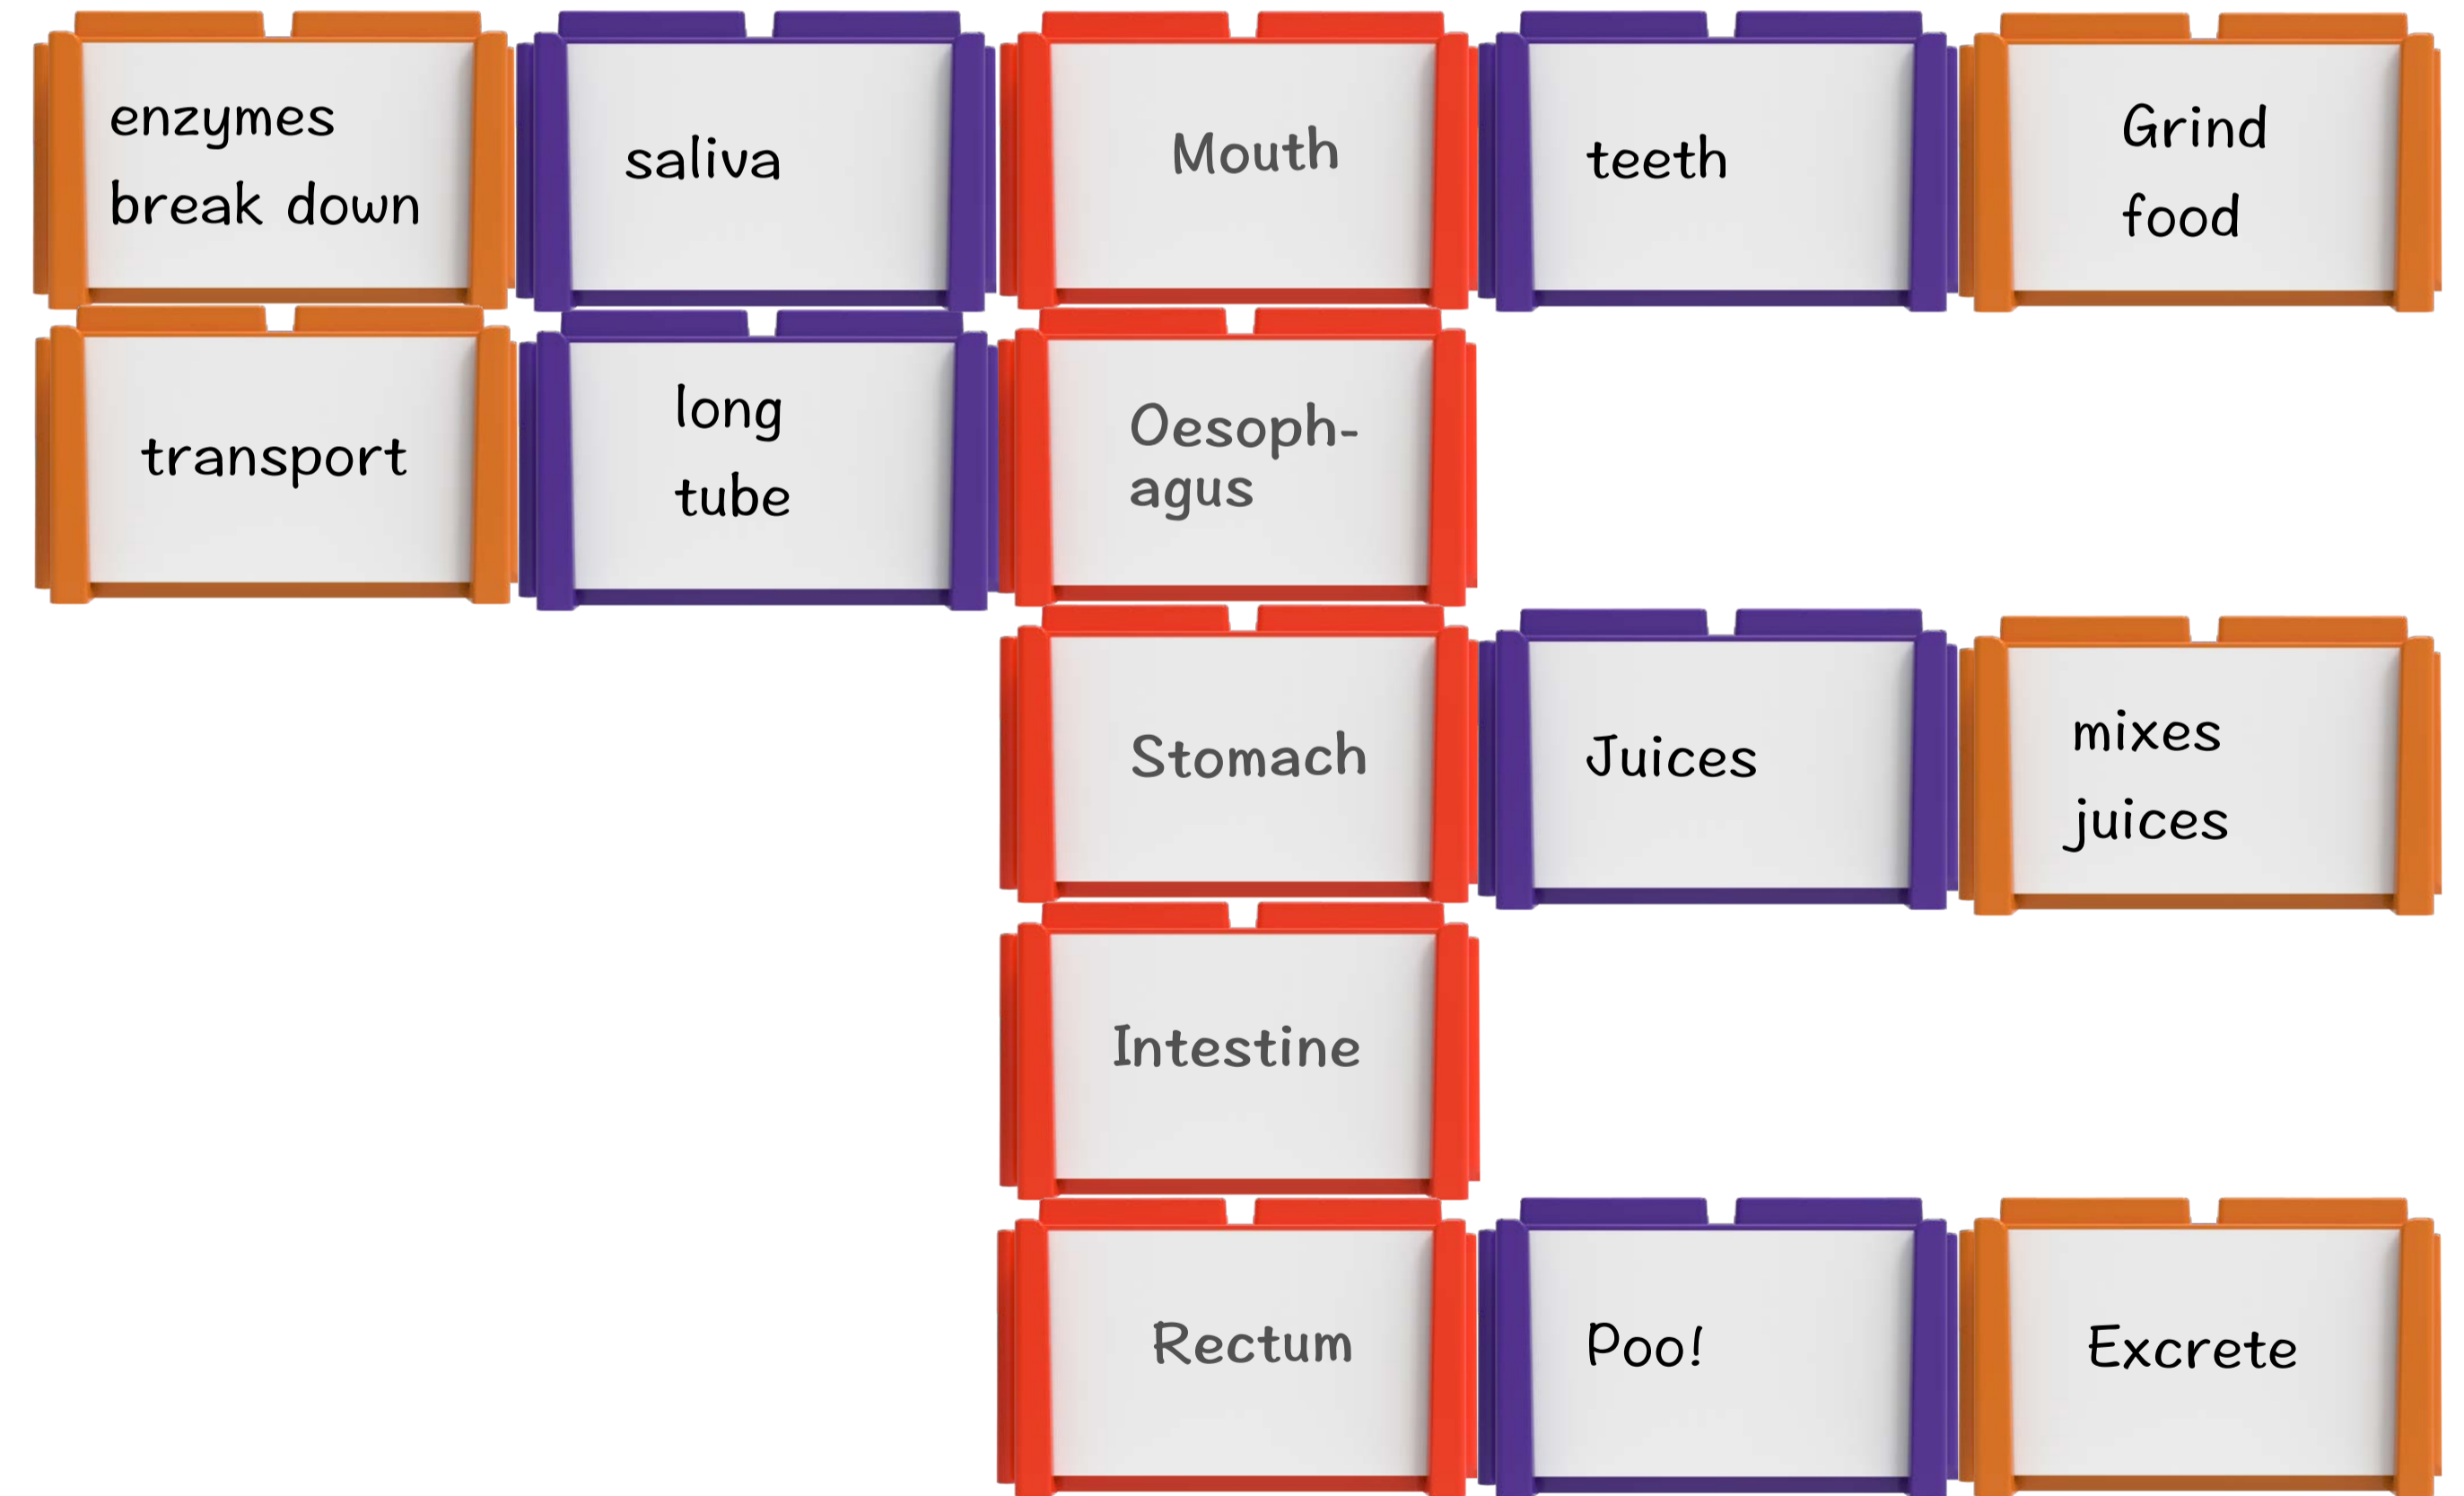

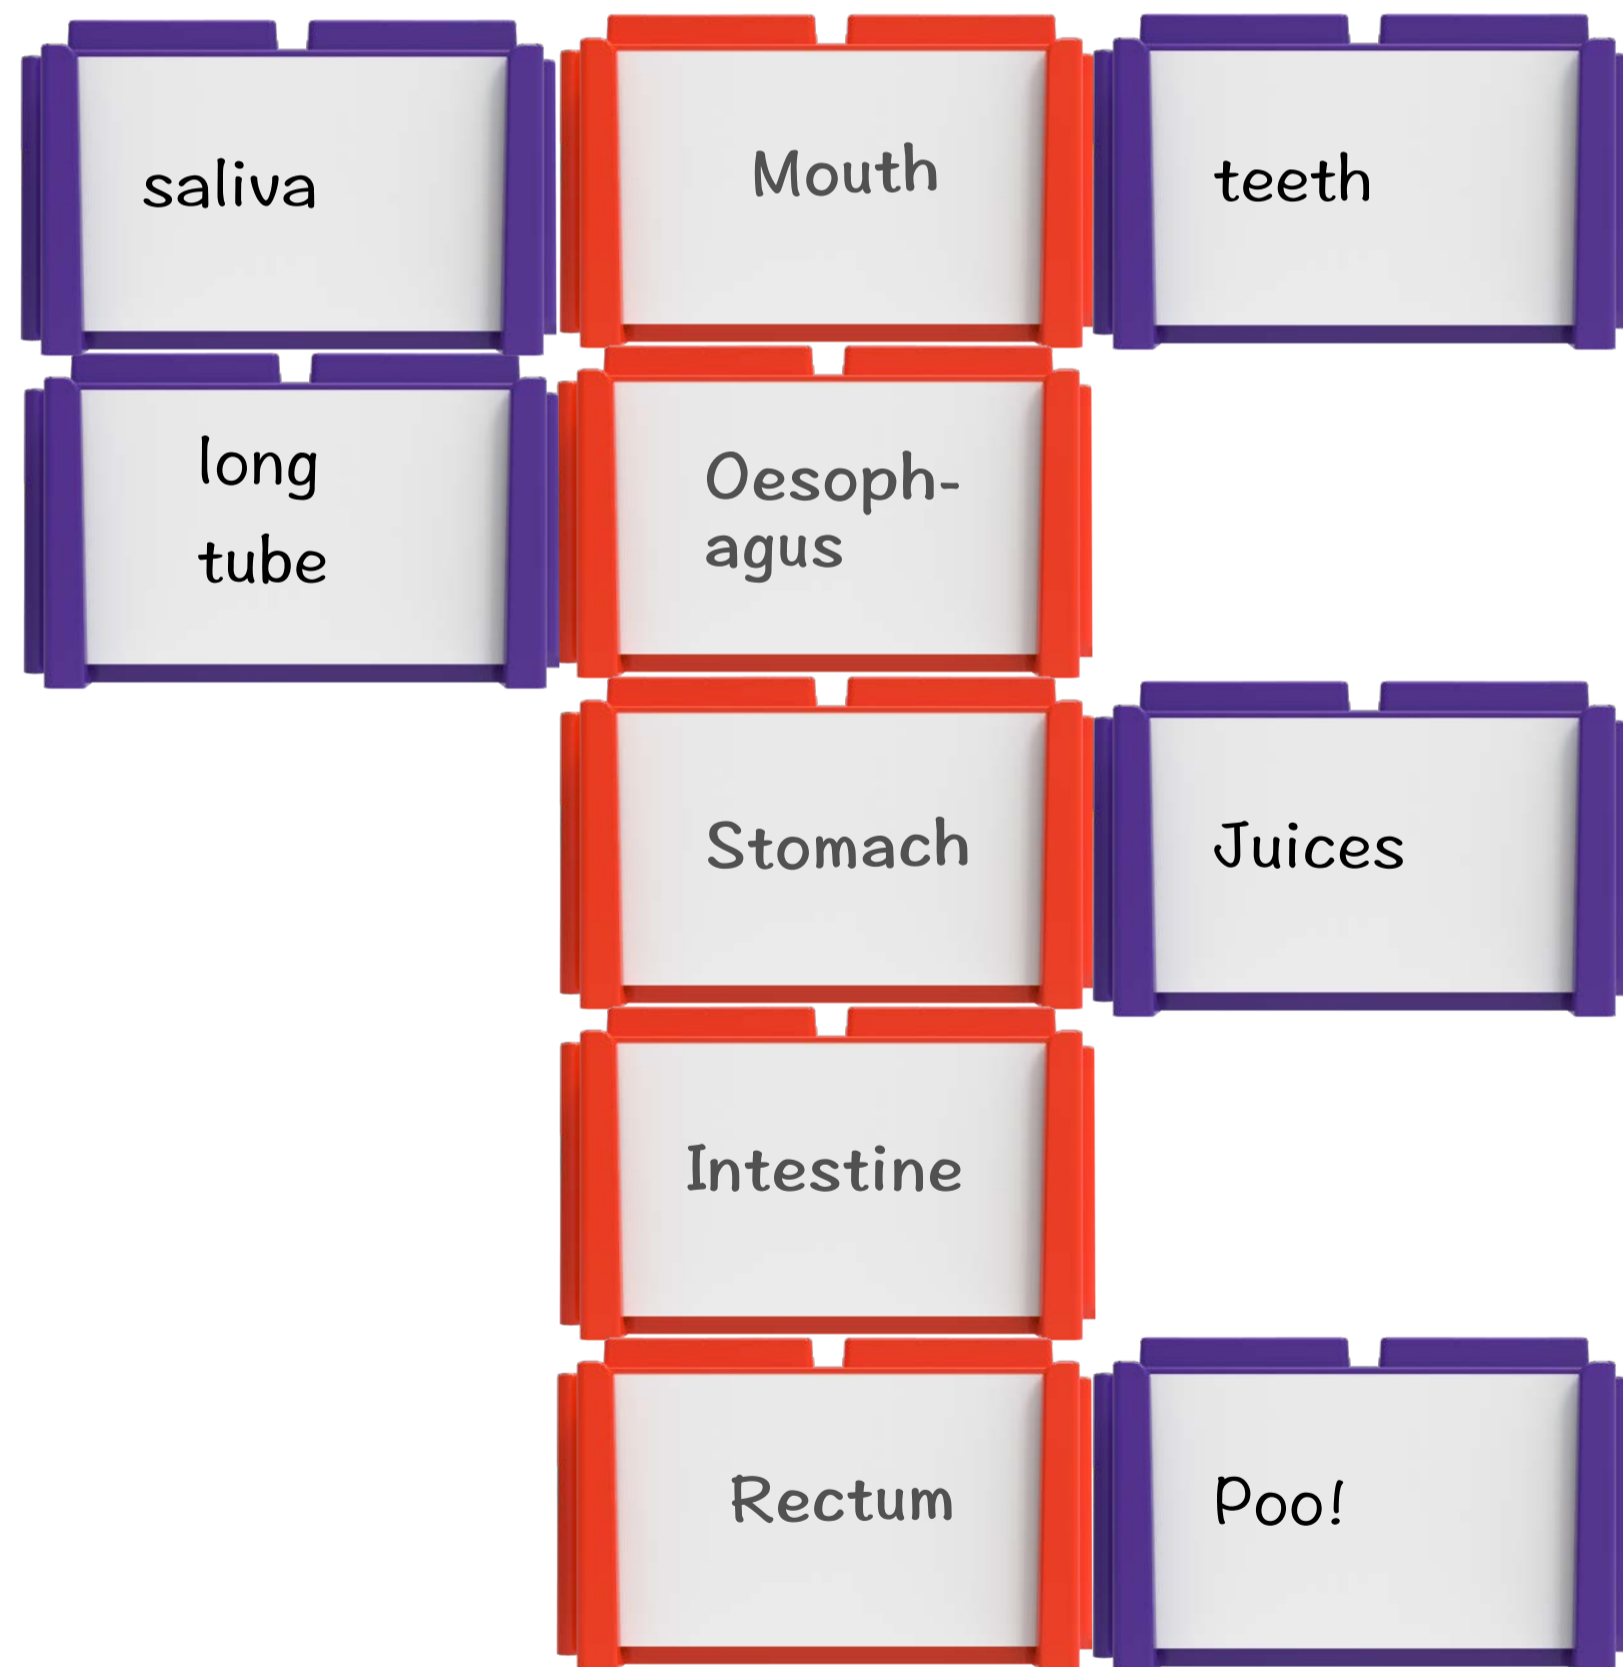

3 Amplify
Provide more features or information.

Guidance
Provide any extra **features** of the organs that are important.

4 Explain
Communicate the essentials.

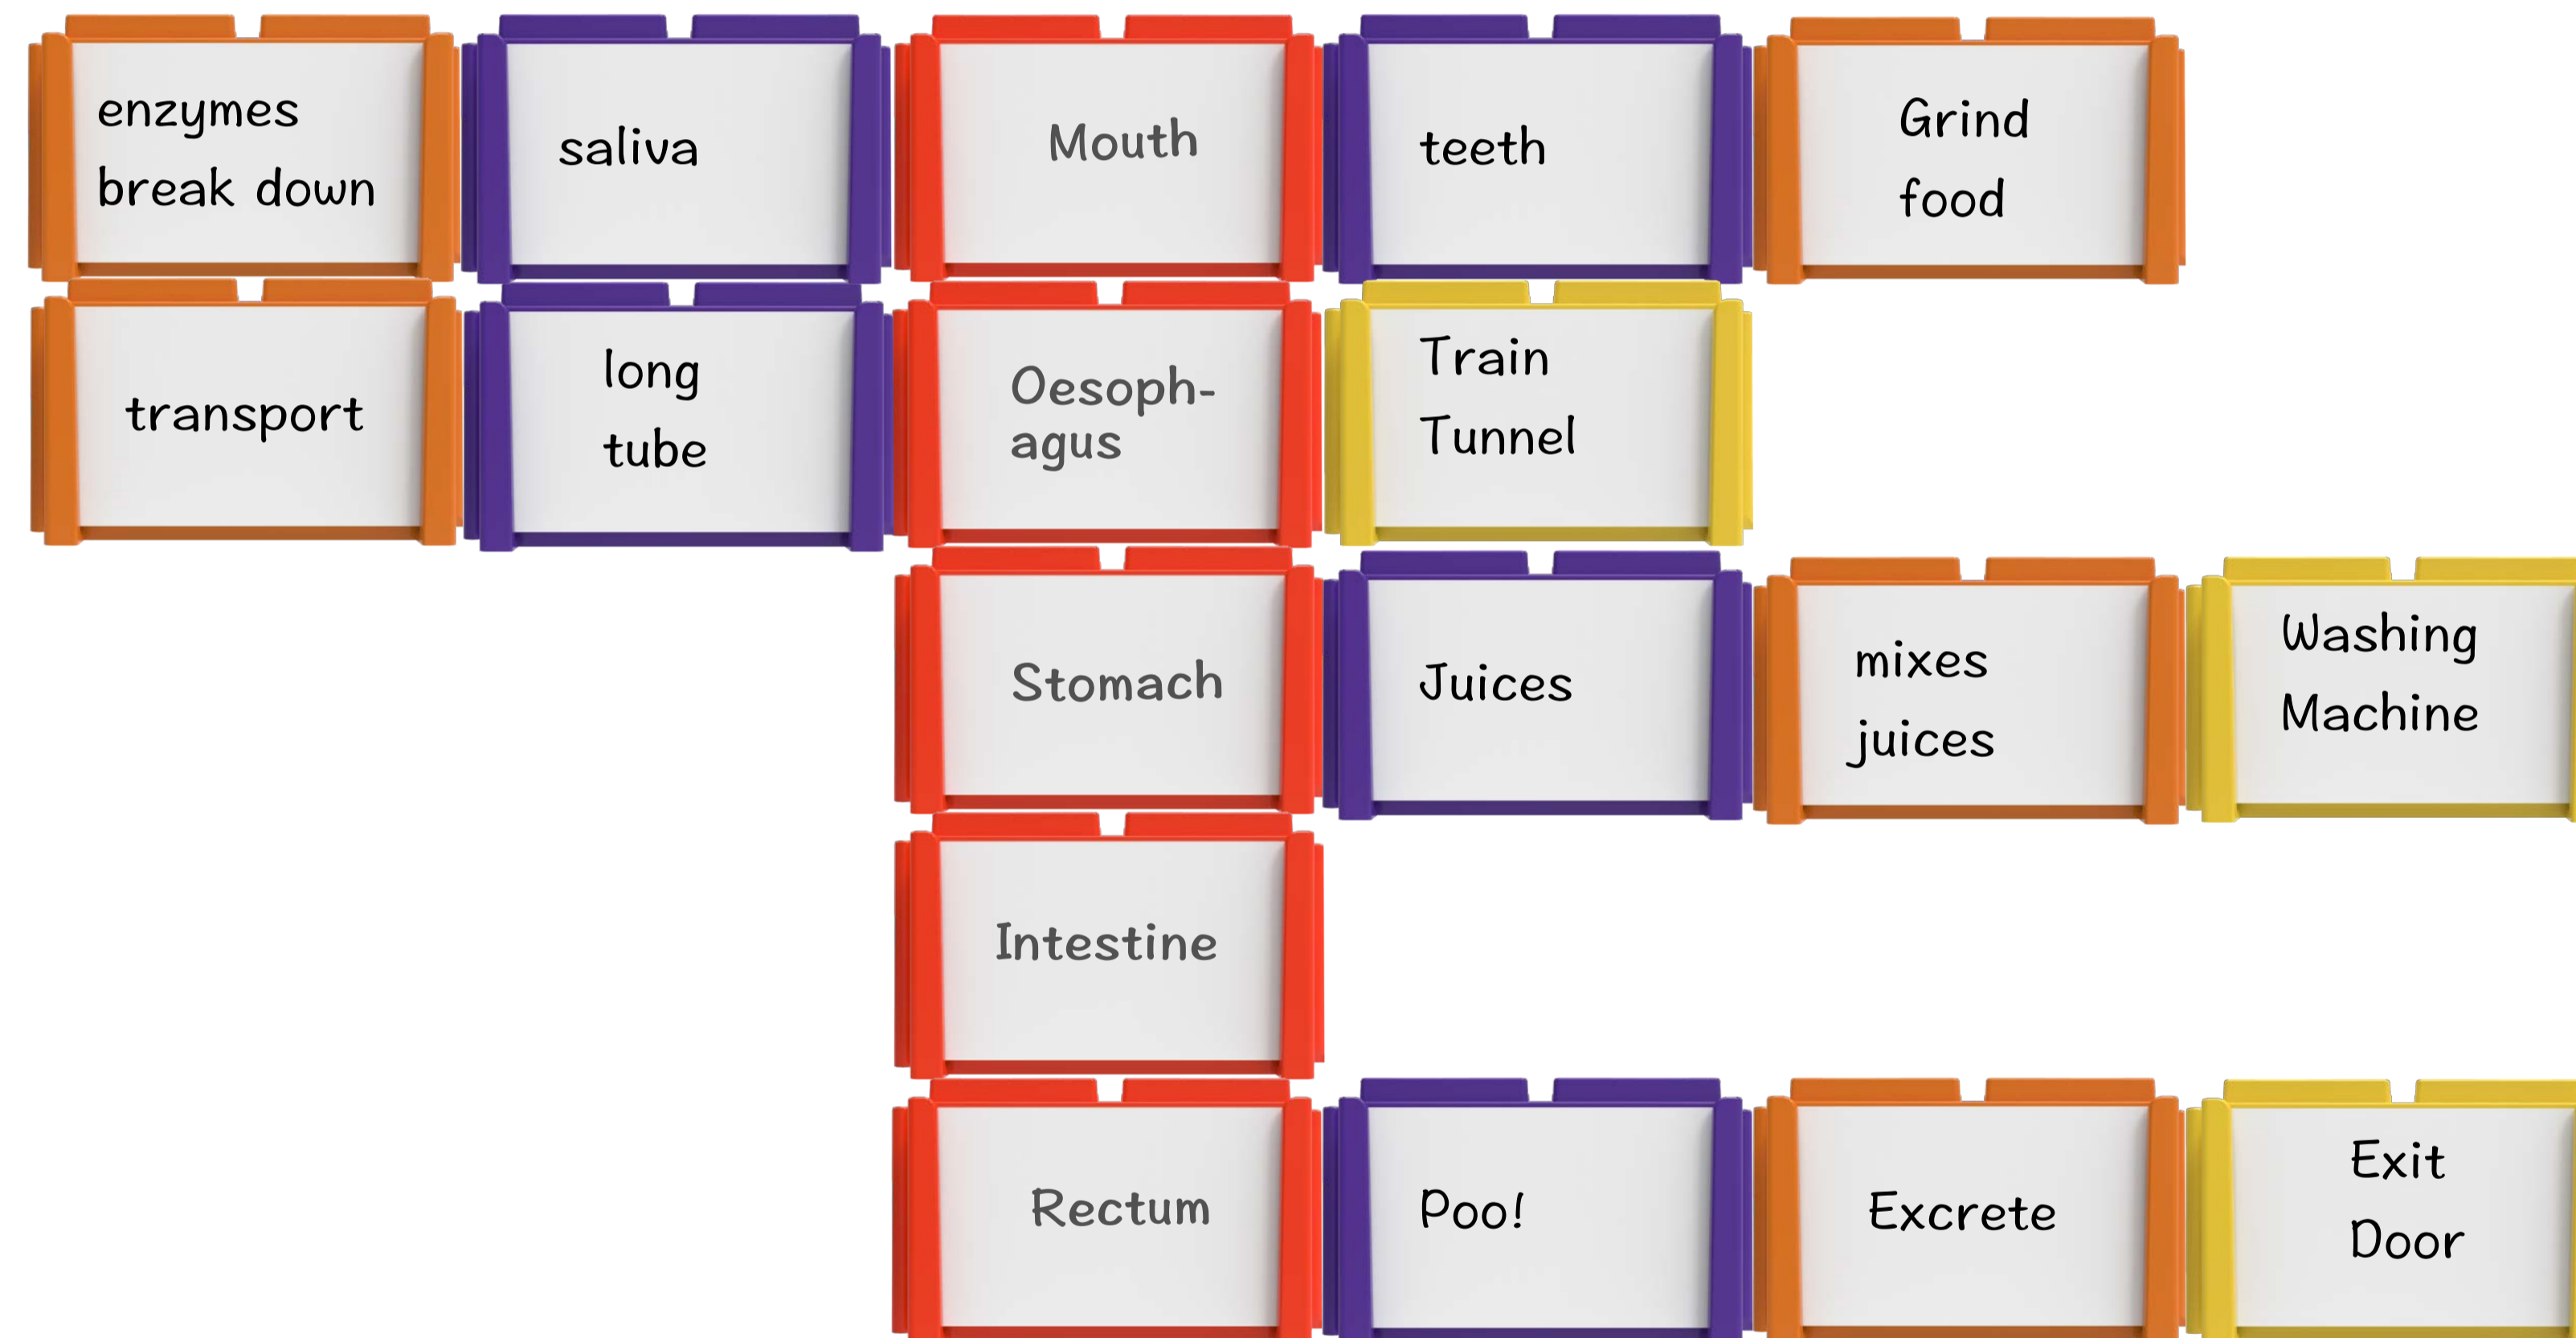

Once the **features** have been added we can then **explain** the function of these organs.

5 Add Analogies

Guidance

The analogies will help the children explain and understand the system by comparing the digestive features to something that is familiar.

6 Add Connectives

Guidance

The events can be linked together with suitable connectives.
