

What's in the Structural Learning Innovation Program?

The Structural Learning Innovation program is a professional development project for teachers. Staff are supported in creating and measuring strategies that address key needs in their classrooms. Underpinned by cognitive science, this professional development program aims to achieve a deeper understanding of the process and mechanisms that underlie learning with the goal of improving educational practice and learning outcomes.

Research Journals for Participants
This step-by-step research framework walks teachers through a simple methodology. [Click here](#) to view a copy.

Access to Educational Research
We have compiled an organised collection of research articles to support participants projects.

Curriculum Materials
We have produced some easy-to-follow planning and implementation resources. These include subject-based overviews and presentations.

Discounted Structural Learning Classroom Kits
The reusable kits consist of bricks and whiteboards.

Structural Learning

Research and Development School

Professional Development Sessions
These workshops can be twilight meetings and will fit around a busy school schedule. The sessions are used for exploring the latest cognitive research and supporting staff with their research. We would recommend a regular contact of once every half-term.

If you are interested in either **commissioning** or **hosting** a project, please contact Paul Main on paul@structural-learning.com.
