

Being Creative

The Learning Skills Framework

Creative Skills

Creativity is a vital skill students need to be successful in school and life. It helps with problem-solving, contributes to our satisfaction in life, and gives us a sense of purpose. Being creative also brings enjoyment to our lives.

Being Creative	
1	Combining information to develop new ideas
2	Creating novel solutions to problems
3	Asking 'what if' questions to theoretical situations
4	Conceiving entirely new ideas
5	Exploring alternatives without immediately accepting them
6	Trying out ideas and seeing what works
7	Looking at a problem from a different angle
8	Generating as many ideas as possible

“ You can’t use up creativity. The more you use, the more you have.
Maya Angelou
