

What's the difference between 4G & 5G?

Speed

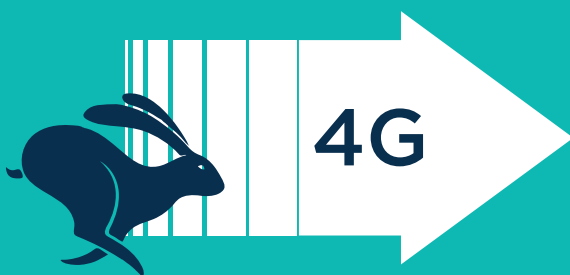

VS

"Downloading an average HD movie on 4G takes 15 minutes, on 5G it will take 3 minutes."

Latency

(the time it takes for information to travel from sender to receiver)

VS

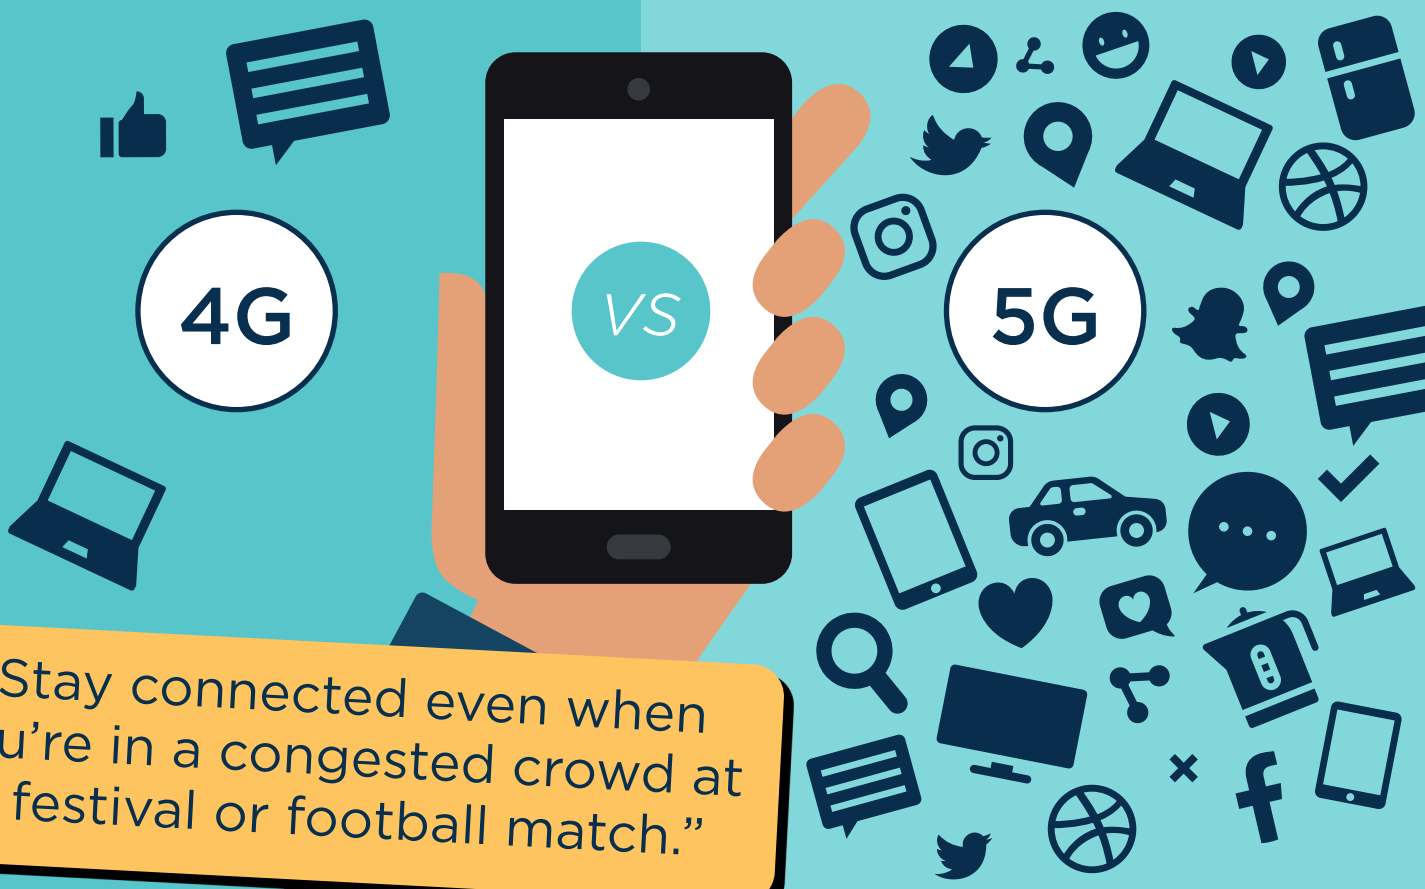

30-40 MILLISECONDS

UNDER 10 MILLISECONDS

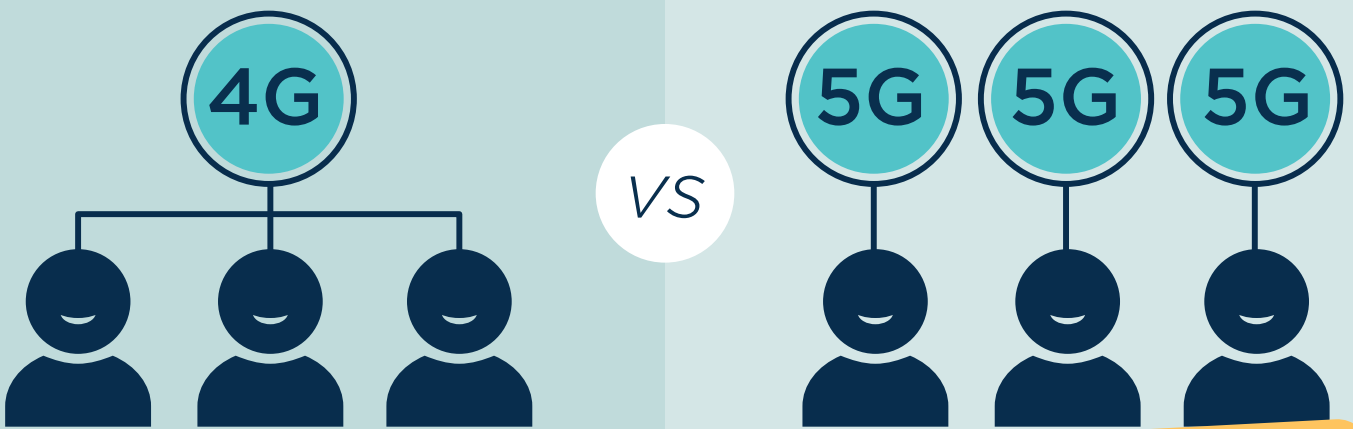

"That's practically instant."

Connected devices

"Stay connected even when you're in a congested crowd at a festival or football match."

Network slicing

"The 5G network can be "sliced" so that vital amenities for the emergency services, local authorities and individual businesses operate on dedicated networks to ensure reliable connections."
