FLIP COMPUTER SCIENCE ON ITS HEAD

unruly STUDIOS

THINK UNRULY!!

JAVASCRIPT/NODE.js DEVELOPER (Part-Time)

WHO ARE WE?

Unruly Studios is a Boston-based EdTech startup. We create products that allow kids to create their own rules. Our flagship product, Unruly Splats, inspires students to learn critical STEM skills through active, social, recess-style play! We're backed by Amazon, AT&T, Techstars, LearnLaunch, and more.

ABOUT OUR TEAM

- We are a remote-first team, but we do have an office in downtown Boston. We are also a team of people-people, so we make an effort to gather in person once per quarter (pandemic permitting).
- We believe in "working smarter, not harder" with flexible work schedules and an unlimited vacation policy.
- We value diversity of experiences and perspectives. We know that there are many pathways to successful roles at Unruly and never require a specific degree or title as a prerequisite.

WHAT WILL YOU DO?

- Join a product and engineering team in developing a full edtech SaaS platform including a teacher-facing portal and student-facing app (Google Chrome web app and iOS iPad app)
- Collaborate with other developers on the engineering and UX teams to develop web applications and microservices on various platforms (mostly AWS)
- Implement front-end interfaces using HTML, CSS, and Javascript using Web Components
- Be an active participant in sprint planning and retrospectives
- Design and build unit and integration tests for your code that align with the development pipeline
- Actively respond to bug reports, user feedback and feature requests as part of the team
- Be largely independent (with support) in managing your version control and devops tasks
- Documentation and experience sharing with other developers and customer success team

WHO ARE WE LOOKING FOR?

- Technical expertise in JavaScript, Node.js and cloud-based microservice development
- Comfortable with online open-source communities and tools
- Effective listener and empathetic communicator
- User ~~focused~~ obsessed
- Keen attention to detail
- Responsive and open to allowing data and user feedback drive your development work
- Sense of humor and out-of-the-box thinker (kids are our primary users)
- Adaptable and dynamic
- Keen attention to detail (i.e. you caught this)
- You care deeply about expanding access to STEM education (for both students and teachers)

PREFERRED EXPERIENCE

- Front end and back end development; iOS app experience; AWS experience
- Typescript and/or Web Components development experience a plus
- An understanding of accessibility on multiple platforms
- Comfortable with version control and devops tools
- Privacy and cybersecurity experience (ideally for K12 education)
- Deeply understanding K12 needs and classroom pedagogy (preferred, not required)
