

# FLEXCELL®

INTERNATIONAL CORPORATION

## APRIL 2016 NEWSLETTER

Vol. 3  
No. 2

**Flexcell®  
Transwell®  
Holders**

### Current Sale!

10% OFF 6-well Tissue Train® Culture Plates

### Upcoming Sales!

**May**—10% OFF 6-well UniFlex® Culture Plates

**June**—5% OFF Thermanox® or Collagel®

**July**—5% OFF FX-5000™ Tension, Compression, or Tissue Train® Systems

*See website each month for more details*

[www.flexcellint.com](http://www.flexcellint.com)

### Upcoming Tradeshows

**Experimental Biology 2016**

April 2-6, 2016  
San Diego, CA

## Co-Culture & Cell Migration Assays with Mechanical Load!

- Analyze cell migration in response to strain.
- Analyze paracrine effects of strain on angiogenesis, inflammation, wound repair, and cell signaling molecules.
- Run experiments with unstrained cells and strained cells in the same well.
- Is compatible with Transwells® for 6- and 24-well plates.

*Transwell is a registered trademark of Corning, Inc.*

**Schematic of Transwell® Holder with a Transwell® in a BioFlex® culture plate well. When vacuum is applied, cells cultured on the BioFlex® membrane undergo - substrate strain, whereas cells in the Transwell® (A) in monolayer or (B) on a matrix gel, like Collagel®, are subjected to paracrine effects from the strained cells.**

## Meet Dunn Labortechnik...

**Our distributor in Europe.** Dunn Labortechnik has been supplying products to researcher organizations, university institutes, and industry since 1982. They will be showcasing Flexcell® products this month at the **3D Cell Culture 2016** meeting in Konzerthaus Freiburg, Germany and in July at the **European Society of Biomechanics** in Lyon, France. For more information on Dunn Labortechnik, please visit their website at <http://www.dunnlab.de/>.
