Flexcell® Fluid Flow Systems

Current Sale!

5% OFF FX-5000™ Tension, Compression, or Tissue Train® Systems

Upcoming Sales!

February
10% OFF 6-well BioFlex® Culture Plates

March
10% OFF 24-well HT Cell Seeders™

April
10% OFF 6-well Tissue Train® Culture Plates

See website each month for more details

Upcoming Tradeshows

Orthopaedic Research Society
March 5-8, 2016
Orlando, FL

Experimental Biology 2016
April 2-6, 2016
San Diego, CA

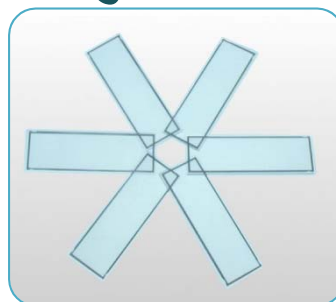

Get in the flow this new year with a Flexcell® Fluid Flow System!

Apply fluid flow to cells in monolayer culture with the **Streamer®**, a 6-chamber fluid shear stress device that can be used in an incubator.

Regulate pulsatile flow, oscillatory flow, and flow reversals with the **Osci-Flow®** Flow Controller.

View real-time cellular responses to fluid flow and/or tensile strain in the **FlexFlow™**, a parallel plate flow chamber.

Use the Flexcell® **StreamSoft™** software to control the peristaltic pump and regulate your fluid flow regimen.

Culture Slips® with Teflon borders to inhibit cell growth to the fluid flow region. For use with the Streamer® and FlexFlow™ devices

Meet LeeBaeg...

Our distributor in South Korea. LeeBaeg Scientific Co., Ltd. has been supplying life science products to researchers since 1997. We welcomed them to North Carolina this past fall when they visited Flexcell for training on proper use, setup, and applications of our equipment. For more information on LeeBaeg, please visit their website at <http://www.lbscience.com/main/main.php>.
