How can you work with what files/artwork you are given by your customers? Learn more about the various file types & managing customer expectations.
Tuesday, February 19, 10 am - 12 pm

Training currently at these locations:

9045 Maier Road, Suite A, Laurel, MD 20723
200 Route 31 North, Suite 109, Flemington, NJ 08822
2400 W. Copans Road, Unit 8, Pompano Beach, FL 33069
2815 Directors Row, Suite 600, Orlando, FL 32809

TYRRELLTECH TIPS 'Tis the Season for Static

Welcome dry weather and winter—and with it, welcome static to your production space. You will feel it when you touch laminate, or electronics, or some days, anything at all. Static can rear its ugly head throughout your production environment and can wreak havoc on your prints and your lamination.

TyrrellTech has several things that can help combat static in various places in your shop. We have static strings with magnets that can be installed on your printer to discharge static as it goes into your printer. We have static strings for vinyl cutters as well. We want to help protect your equipment and save you from that heart stopping shock that you can get when you get a big static charge!

And, when all else fails or if you are in a pinch, remember... dryer sheets have about a million uses, and one of them is rubbing them ever so lightly over your vinyl or laminate to discharge static!

ACH is now a Payment Option!

TyrrellTech now has the ability to accept payments by ACH. If you are interested in ACH as a payment method, please send the request to info@tyrrelltech.com and we can send the approval form to you for completion –Feel free to contact us with any questions, thank you for your continued business.

MEDIA MAYHEM

BlackBoard Heat Transfer Vinyl

Write it, Wipe it, Repeat!

Now you can turn any fabric into a writable surface that can be used over and over again! New BlackBoard heat transfer vinyl by Siser, transforms plain materials into a walking chalkboard– without making you feel like a walking sandwich board!

Lightweight and super soft, BlackBoard is unlike any HTV you've ever experienced. This revolutionary material only needs 275°F of heat with medium pressure for just 15 seconds to create a machine washable chalkboard! With a low application temperature and warm peel carrier, this HTV is ideal for heat sensitive materials.

Compatible with standard chalk, Blackboard is as easy to re-use as it is to apply. Simply wipe clean with a damp cloth to start again! There are countless ways to advertise, organize, and customize with BlackBoard heat transfer vinyl. Great for holiday gift shirts!!

BB150500	Siser BlackBoard 15" x 5yds	\$50.49
BB151000	Siser BlackBoard 15" x 10yds	\$94.79
BB152500	Siser BlackBoard 15" x 25yds	\$207.17
BB155000	Siser BlackBoard 15" x 50yds	\$389.97

Arlon SLX Wrap Kit- Try it & Get Money Back!

GET MORE +
SAVE MORE
REBATE

GET PAID IN 48 HOURS
 \$1000 = 10 Kits
 \$450 = 5 Kits
 \$175 = 2 Kits

STACK + SAVE

Buy more kits to increase your rebate. For your purchase of 2, 5, or 10 kits, the rebate amount increases! Mix and match kits of SLX Cast Wrap and DPF 610XLP.

Each 10 Kits = \$1000 Rebate
 Each 5 Kits = \$450 Rebate
 Each 2 Kits = \$175 Rebate

You can also stack your purchases. Combine 2 out of 3 unique tiers for a higher rebate payout. One submission with up to two orders will be accepted. Each order must reflect a purchase of either 2, 5, or 10 kits. For example, one submission can include multiple invoices reflecting two orders - one order of 10 kits and a second order of 5 kits receives a \$1450 rebate (\$1000 for 10 kits + \$450 for 5 kits = \$1450 for 15 kits). Make the most of it!

Promotion runs November 26 – January 31, 2019

**CWT 1640
Premium
Save
\$2,500**

Free Swag!

Free Linear Cutter, Compressor, Long Reach Knife, Sticky Roller & Sticky Pad!!

Offer Good Until December 31, 2018

Why A Worktable?

CWT work tables are easy to use so there is no need for special staff, most people can operate the applicator within one hour with fantastic results. Our flat bed applicator gives much better control and less waste than conventional roll laminators due to the easy and precise positioning of the materials and allows a much wider range of materials to be laminated. The modular design makes the CWT worktable easy to transport and install. The units are delivered in compact packages, 80% less in volume compared to other suppliers'. The low transportation cost taken aside, the slim package can easily be brought inside customer's facilities through normal sized doors.

	Bed Size	Work Space
CWT 1016 Advantage	5'4.5" x 3'3"	4'4.7" x 3' 1.4"
CWT 1630 Regular	9'10" x 5'3"	8' 5" x 5'
CWT 1630 Premium	9'10" x 5'3"	8' 5" x 5'
CWT 1640 Regular	13'1" x 5'3"	11' 8" x 5'
CWT 1640 Premium	13'1" x 5'3"	11' 8" x 5'
CWT 1647 Premium	15'5" x 5'3"	14' x 5'
CWT 1840 Premium	13'1" x 5'11"	11' 8" x 5' 8"
CWT 1847 Premium	15'5" x 5'11"	14' x 5' 8"
CWT 2140 Premium	13'1" x 6'11"	11' 8" x 6' 9"
CWT 2147 Premium	15'5" x 6'11"	14' x 6' 9"

And, all new this year.... you can add an electronic lift kit to your CWT table, or you can buy the Platinum edition, with the lift kit included as part of the table.

CWT 1737 Platinum with a 10' 7" x 5' 4" Work Space

Roland Releases Versaworks 6!

Whether you need an uncomplicated RIP solution for fast and easy printing, or you're looking to upgrade to the latest, feature-packed RIP software, VersaWorks 6 expands your printer capabilities and maximizes the power of your Roland devices.

A new, modern-looking user interface offers clean and simple tools with drag-and-drop functionality to quickly add jobs to the print queue directly from folders on your desktop. A more icon-based RIP environment improves user experience and provides easy navigation and functionality for all your print tasks and job management.

VersaWorks 6 has a powerful Harlequin RIP dual core engine with 64-bit native processing to improve processing capacity. It processes and previews multi-layered files much faster and accurately recognizes complex transparencies, drop shadows and other effects in your files.

VersaWorks 6 helps busy print shops plan and organize print production in advance with five print queues. Combined with five hot folders and unlimited queue settings, you can save and store options, capture specific print settings, and make production a fast, automated and continuous process.

For users with multiple Roland printers of the same model and ink type, VersaWorks 6 offers printer color matching to ensure consistent color output on every print. Print and scan values from a printer and transfer the color values to matching Roland devices to compensate for color differences from one device to the next. This new color matching feature gives print users the distinct advantage of printing large-scale jobs, high quantity jobs and recurring customer jobs on multiple devices.

ENGRAVER CORNER

Universal Laser PLS4.75

The PLS4.75 is a free-standing platform with a materials processing envelope of 24" x 18" x 9" or 3,888 in³ (610 x 457 x 229 mm or 63,713 cm³). The single laser platform supports either one 10.6μ CO2 laser (10 to 75 watts) or one 9.3μ CO2 laser (30, 50, or 75 watts).

This model offers some unique features that set it apart.

High Reliability Digital Motors- Universal's laser systems use high quality digital motors which don't require expensive and complicated optical encoders to function, increasing reliability.

Intelligent Laser Energy Management Engine- This feature maintains consistent energy density at any processing speed producing uniform marks and constant depth when cutting, marking and engraving.

Laminated Safety Glass- Glass viewing windows creating a safe enclosure for laser processing.

LCD Display- PLS/ILS laser systems come equipped with an on-board LCD display, allowing you to move the motion system and Z-axis manually during setup or to change job settings on the fly. This function is useful when determining optimal settings for new applications.

Multiple Automatic Focusing Methods- All Universal laser systems can be focused automatically based on material thickness or by using a convenient manual focusing tool. Some Universal laser systems can also be automatically focused using special sensors to detect the top surface of the material being laser processed.

Multiple Language Support- Supported languages include English, German, Japanese, Spanish, French, Italian, and more.

Over-Temp Alarm (for fire safety)- An over temperature alarm installed in every Universal laser system monitors the temperature of the work area. If an unusually high temperature is detected the system will turn off the laser and trigger an audible alarm.

Permanently Sealed Bearings- Our sealed, self-lubricating motion system bearings keep dust and debris out, resulting in a longer bearing life.

Stretch-Free Kevlar Belts- Durable belts provide a long life of reliable processing.

And now, for the BIGGEST reason to get one today. For a limited time, through December 31, 2018, ULS will offer customers a 15% discount on the PLS4.75 platform (with a free standard 2.0 lens) and laser, with additional discounts on select options. This pricing requires a laser configuration of 30W or more.

Call TyrrellTech today to learn more- 888-865-0300.
