## GFP Laminator Spotlight!

Do you feel like you have a great print solution but you need a great finishing solution to mount and laminate your prints for added versatility and durability? TyrrellTech loves promoting the GFP brand laminators, with everything from 30" to 63" widths, in cold, heat assist and hot laminating solutions.

Check out the whole line of GFP laminators and let us get you info on the perfect finishing solution for you! Call or email to schedule a demo- 888-865-0300 info@tyrrelltech.com

**Roland VF2 Printer- Color That's Off the Charts!**

The Roland TrueVIS VF2-640 large format printer doesn't just widen your color gamut; It takes your color completely off-the-chart with our richest and most vivid TrueVIS color output yet. This printer allows you to perfectly target specific brand colors-- even those popular green and orange ones

Award-winning TR2 Inks feature new Green and Orange ink choices to target previously unreachable or difficult-to-match colors. This printer offers smooth, seamless print operation with enhanced design, job sequences, software functions, operation panel and "two-mode" take-up unit.

And, if you have a busy shop where volume is high, print/cut or print only solutions can be paired with a vinyl cutter to take the cutting offline for big cut jobs. If you have a bunch of stickers to run, TyrrellTech has cutting solutions from both Roland and Graph-tec- call 888-865-0300 or email info@tyrrelltech.com to learn more!

*"Have the dogged determination to follow through to achieve your goal; Regardless of circumstances or whatever other people say, think or do."*

All 4 of these new accessories are now available, come in and get yours today!

EasyWeeder \$12.99

Tweezer \$12.99

Weeder/Tweezer Tool Set \$24.99

Heat Tape (2cm x 20m) \$4.99

## Wrap More Than Just Cars...

Wrap materials can be used for more than just wrapping vehicles. Check out these carefully wrapped gaming controllers, decorated using the Orafol 3751 Pro Slide media and 290 cast laminate.

The cast qualities of this high performance vinyl make it capable of wrapping around the

curves of the controllers. And the nature of the material means that they will not shrink or come apart easily—those graphics

are there to stay. Finding a niche like this can really set you apart and help you gain business that is specialized, fun and profitable.

## FLOOR GRAPHICS SPOTLIGHT

### Walk N Wall in Stock- One Step Floor Graphics

We have lots of stock of a one step floor graphic solution-- no need to print then laminate-- just print and this product, with its skid resistant print surface, will be ready to go down on the floor! And, as the name reminds us, this media has the right adhesive to double as a great solution for wall graphics, too! panoRama Walk&Wall is a printable, textured matte vinyl backed with fabric for dimensional stability and strength, and coated with a clear adhesive. Designed for short- to medium-term applications, Walk&Wall is ideal for carpet, tile, concrete, wood and PVC floors, untreated stone, concrete block, and short- and medium-pile carpet, both indoor and outdoor.

**WALKWALL4882 - 48" x 82' - \$449.95**

### One Step Outdoor Floor Graphics

Alumabond is an 8 mil aluminum film/foil with a white textured print coating and permanent, clear adhesive. The aluminum base makes Alumabond fully conformable to complex wall and floor surfaces, such as brick and asphalt. A sand-textured print coating adds slip resistance. Alumabond is compatible with Mild Solvent, Eco-Solvent, Latex, and UVc printers. Use for intermediate- to long-term applications where conformity is necessary, especially for complex surfaces such as brick, asphalt, and any other highly textured surface.

**RALUMABOND-5432 - 54" x 32ft - \$430.95**

## Roland TR2 Value Up Promo Extended

If you still have an SG or VG printer running on the original TrueVIS inks and you have not yet upgraded to the new and improved TR2 inks- now is the time! Roland is offering promotional pricing to upgrade if you act now! The benefits of TR2 inks include improved maintenance and printer performance and expanded gamut. Jump on board with a TR2 promotional upgrade now-- then, you can upgrade the ink, firmware and Versaworks 6 software when you find time between jobs, and you will be ready to go!

### Upgrade your Roland VG or SG TrueVIS Printer to all new TR2 inks with extended promo pricing

VALUEUP-4COLOR-K	<del>\$1,021.74</del>	<b>Promo Price \$759.99</b>
VALUEUP-7COLOR-K	<del>\$1,021.74</del>	<b>Promo Price \$759.99</b>
VALUEUP-WHITE-K	<del>\$973.74</del>	<b>Promo Price \$729.99</b>
VALUEUP-SG-K	<del>\$559.99</del>	<b>Promo Price \$419.99</b>

TR ink manufacturing is officially over- you must upgrade!

## Roland TrafficWorks

TrafficWorks opens your sign shop up to new growth and opportunity. It also offers your construction business, DOT traffic sign suppliers, or other commercial company a simple in-house sign solution. The most versatile solution on the market, TrafficWorks features a streamlined integrated print and contour cut process that eliminates the fuss and expense of most traditional print methods. It allows your business to create ASTM, MUTCD, and FHwy compliant signage in a uniquely quick and cost-effective manner.

There's not just one TrafficWorks kit option. We have multiple kits at different price points. Find the street sign printer solution that's right for your existing equipment and production needs.

### Get the Full Kit with a VG2 and Dryer Unit

If you don't currently own a TrueVIS VG2 series printer/cutter or a dryer unit, you can purchase a full kit to get you producing and profiting in traffic signage

### Already Own a VG2? No Problem!

If you already own a TrueVIS VG2 series printer/cutter with dryer unit, and 7-color + Or Ink, we have a solution kit for you.

Roland DGA TrafficWorks design and RIP software (customized by SAi) was developed to make on-demand traffic sign production more straightforward and intuitive. It includes 3,200 compliant sign templates, a traffic-specific color library, fonts, and a selection of custom profiles.

## UV PRINTING

### Mimaki's Newest UV Flatbed Printer

Mimaki is taking flatbed printing to the next level with the JFX200-2513 EX.

This innovative printer adds new productivity and functionality to our proven JFX200 technology. It also adds extra dimension to graphics with an advanced 2.5D Print Function that lets you create realistic textured effects up to 0.5 mm high - with the touch of a button.

- Print on a 4' x 8' board or a variety of pre-cut pieces up to 2" thick
- Print as many as 12 boards per hour
- Three staggered printheads for simultaneous printing when using white and clear inks
- Foot pedal to easily control vacuum when loading media
- Dual-zoned vacuum table and user-adjustable layout pins
- Nozzle Check Unit included
- Eco-friendly with low VOC, GREENGUARD Gold certified UV-LED inks
- Updated RIP software RasterLink6 Plus to support 2.5D textured print workflows

2.5D TEXTURE MAKER: FILE CREATION TIPS THROUGH PRINT - JFX200-2513 EX

### Canon Colorado- Ink at Only 8¢ Per Square Foot

The large format print industry has seen a lot of innovation over the years. Sometimes it seems that it cannot get any faster or higher resolution. But then, something like the Canon Colorado comes along. There are some stand out benefits that cannot be overlooked, including:

**Ink costs at 8¢ per square foot**

**Speeds up to 1,700 square feet per hour**

**Continuous color consistency**

**A machine that pays for itself if you print 12 rolls of vinyl a month**

If you feel like you have seen it all in this industry and that recent innovations haven't felt like the huge leaps they used to be, let this machine get you excited all over again. TyrrellTech can show you, live and in person, the Canon Colorado and all that it can do to change your business. Call today to set up a demo- 888-865-0300.

# ENGRAVER CORNER

## Kern Lasers & Warranty Promo

TyrrellTech has paired with Kern Lasers in a big way! Kern Laser Systems is a leading manufacturer of fiber and CO2 laser cutting and engraving equipment. Family owned and operated, Kern lasers are proudly made in the USA.

Kern laser systems can be equipped with innovative technology which allows for accurate cutting of sheet metal. Commonly cut metals include stainless steel, mild steel, aluminum and brass.

The Automatic Focusing Height Follower, developed by Kern Lasers, is one of the key elements for optimal metal cutting. The cutting nozzle is controlled by a capacitance sensor and z-axis motor. The gap between the metal being cut and the cutting nozzle can be adjusted until the desired beam focus is obtained. As the cutting process begins the height follower will track the surface of the metal and adjust the nozzle in the z-axis maintaining a constant focus point while the metal is being cut.

The metal cutting table is constructed of a durable steel grid work which minimizes the surface contact with the bottom side of the metal being cut. A 4' x 8' or 5' x 10' sheet of metal will fit comfortably onto Kern's largest cutting tables. Larger table sizes can be custom ordered to meet your applications' specific needs.

Call today to set up a chance to see it in person! 888-865-0300

## Universal Laser Systems ULTRA R9000- Increased Power & Productivity

### UNIVERSAL LASER SYSTEMS

- Large Format Hybrid laser
- CO2 and Fiber laser options
- High powered laser up to 300 watts
- Rapid laser beam positioning
- Controllable laser power density
- Multi-camera vision & registration
- Support for fire suppression

The ULTRA R9000 platform has a materials processing envelope of 48" x 24", with support for materials with a thickness up to 12". Check out this amazing new machine that can do so very much more.

### Some Birthdays that we need to celebrate!

**Travis Knutson, March 19-** MD Laser Sales & Service

**Jodie Samuels, March 20-** FL Customer Service

**Kevin Thammavongsa, April 7-** FL Customer Service
