

# Daniel Golman

Washington, DC  
dgolman@vt.edu  
202-660-2459

## Experience

### **Mentor** - Thinkful

*ReactJS, Node.js, Express, MongoDB*

June 2018 - Present

*Washington, DC*

Mentor students in the Thinkful Engineering Immersion Bootcamp to help them overcome their mental roadblocks, pair program and guide them to be successful throughout the 6 month program.

### **Lead Engineer** - 540.co

*AngularJS, Rails 5 API*

October 2017 - Present

*Washington, DC*

Refactor, maintain and enhance feature sets for a secret project. Lead backend engineer of a team of four using a Rails 5 API to combat enemy threats.

### **Technical Lead** - Booz Allen Hamilton

*AngularJS, Node.js, MongoDB*

June 2017 - October 2017

*Washington, DC*

Prototyping a custom proposal generator with Elasticsearch to allow multiple collaborators to search and edit client proposals internally to improve collaboration between team members and increase the number of clients we win.

### **Software Engineer** - Revv

*Ruby on Rails, AWS, Travis CI, Jenkins*

July 2016 - January 2017

*Washington, DC*

Led Apple Pay and Stripe integration team to put our company as first to market Apple Pay processor for political donations while simultaneously building donor facing tools for over 500k small dollar donors on our platform with over 50k dollars processed from Apple Pay.

### **Junior Developer** - CapTech Ventures

*AngularJS, Java, MongoDB*

August 2015 - February 2016

*Richmond, VA*

Implemented TDD with JUnit to ensure clean and robust code throughout our team while refactoring code to increase performance and scalability of a Java/MongoDB backend by 6 times.

## Education

### **B.S. Computer Science**, Virginia Tech

May 2015

*Blacksburg, VA*
