

NexTEON Technologies is modernizing global aviation with best-in-class talent and technologies. Its innovative solutions enable more efficient, greener and more secure global aviation for ANSPs, commercial and general aviation fleets, and government agencies.

Leadership Team:

Chief Executive Officer Rob Kaimowitz
 President and COO Jill Wittels
 Chief Financial Officer Samir Shah

Headquarters: Ambler, PA

Founded: 2017

Website: www.nexTEON.aero

Products:

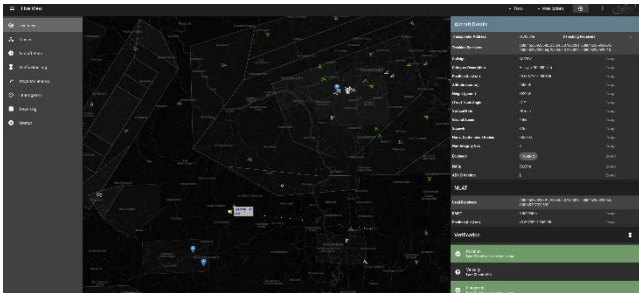

- SmartRoutes Real-Time Route Optimization Solution
- SecureTrack Air Surveillance Data Solution

Key Market Segments:

- Air Navigation Service Providers
- Commercial and General Aviation Airline Fleets
- Aviation Stakeholders

SECURETRACK[™]

Offers an unmatched level of surveillance data security and market-leading precision

- Captures the improved precision of ADS-B surveillance by employing an advanced data processing methodology to generate cybersecure and GPS-resilient air traffic surveillance data.
- Uses existing aircraft signals and equipment — promoting faster adoption, lower costs and smoother implementation periods.
- Provides high precision update rates that match or exceed ADS-B standards.
- Enables Navigation GradeSM data.

SMARTROUTES[™]

Generates more efficient air navigation through real-time route optimization

- Continuously analyzes all en route aircraft in the National Airspace System for more efficient wind-corrected routing options.
- Operates in the Cloud – no airline data system intrusion and no capital investment required.
- Advisories can be delivered to Dispatch or direct to cockpit Electronic Flight Bag (EFB).
- Minimizes flight time and reduces emissions, while maximizing fuel savings, and improving on-time performance.
