

ARE YOU A PRODUCER OR TRADER OF 3TGS?

Your EU customers need to comply with the EU Conflict Minerals Regulation, which has entered into effect on 1 January 2021.

You can increase the value of your products by:

1. Demonstrating exemplary practises,
2. Providing the information needed by your customers to comply with the EU regulation.

WHAT IS ORESOURCE?

OreSource offers custom templates and analytics to help you comply with the EU Conflict Mineral Regulation.

The templates, tailored to your reporting requirements, guide your team members to submit exactly the information the importer will need.

The analytical tools allow the importer to understand their supply chains better, work closely with suppliers to support them with reporting, and ensure all of their imports have been sourced responsibly.

WHAT ARE THE ADVANTAGES FOR YOU?

- A tool that helps you identify which information is relevant to comply with EU Regulations.
- High-quality, secure communication of due diligence information with your customers.
- Added value to your product through transparency.
- Enhanced market access for your goods in an increasingly regulated environment.

ORESOURCE

STREAMLINING SUPPLY CHAIN COMPLIANCE

HOW DOES IT WORK?

- Built on Minespider's blockchain, designed for the minerals industry.
- OreSource creates digital Passports that link data from supply chain participants to unique identifiers and QR-Codes.
- The Passports can be attached to physical material shipments and will be read by the recipients of the shipments.

REGULATION DETAILS

EU Conflict Minerals Regulation (EU 2017/821) has entered into effect on 1 January 2021.

Under this regulation, importers of Conflict Minerals (Tin, Tantalum, Tungsten, and Gold) must ensure that their imports have been sourced and processed responsibly and have not contributed to conflict.
