

Biosorb Boom

Length adjustable bioremediation solution for land and water.

Product Information

Fluid Absorbed	Oil-based liquids, hydrocarbons
Color	White
Absorbency	48-108 lbs per Boom
Configuration	Boom
Material	Multi-Filament Polypropylene
Filler	Kenaf Fiber
Weight 5" x 10'	26 lbs
Weight 8" x 10'	36 lbs

Features

- Absorbs up to 10x's its weight.
- Can be used until completely saturated, which typically occurs after a few uses.
- White color mesh makes it easy to spot saturated booms.
- Hydrophobic and will continue to float on water, even when completely saturated with oil.
- Contains natural microbes that enhance bioremediation. Translation: this boom absorbs spills fast. Really fast.
- Filler material is a 100% Biodegradable, annually renewable resource made from plant fiber.
- Outer mesh material can endure tugging and harsh movements.
- High absorbency rates, ability to reuse, and ease of cleanup make these booms very affordable.
- Can be used around any type of machinery and are not flammable.
- Offers multiple options for disposal, as opposed to clay and other types of industrial absorbents.

Product #	Description	Absorption Capacity	Unit	Quantity	Shipping Weight
25	5" x 10'	48 lbs	Case	5	26 lbs
28	8" x 10'	108 lbs	Case	4	36 lbs
