“Science and psychology are necessary for effective information security. This combination enables us to offer state-of-the-art training solutions and tailor them to the needs of your specific business.”

Dr. Thomas Schlienger,
TreeSolution Consulting, CEO and founder
Looking for an effective awareness training program?

We offer you standard courses as well as individual and modular programs, tailored exactly to your needs and target audience.

- Standardized e-learning courses
- Custom-tailored trainings
- Individual developments
- Game-based e-learnings
- Secure behaviour becomes part of the corporate culture
Trainings

We provide effective and well-rounded trainings. In this way you can increase security and compliance through awareness training within your organization.

Structure

The courses are methodically and didactically structured so that only a minimum of effort by the learner is required for a maximum of learning effect - this makes learning even more fun.

Support

TreeSolution provides you comprehensive and professional support in order to bring security matters closer to employees and management.

We offer you individual and modular programs, tailored exactly to your needs and target audience:

- Standardized e-learning courses (gamified and non-gamified)
- Custom-tailored trainings
- Individual developments
We offer the full range of customizations. The design and content of all our courses can easily be adapted to the needs of your organization. In this way you increase security and compliance within your organization to an optimum.

**MODULES**
You can select the subject modules according to your needs and combine them to a course. Thus you train exactly the subjects which must be trained.

**CONTENTS**
Also the contents and language can be adapted to your situation to get the maximum out of the course.

**DESIGN**
To achieve an instant brand recognition, the design can easily be adapted to your corporate design.

**INTEGRATION**
The courses can be integrated in your existing e-learning platform, delivered with a new platform or hosted in the cloud.
“TreeSolution has strongly increased the efficiency and sustainability of our training and awareness campaigns.”

Franziska De Rosa, Security Officer, Swisscom AG
Numerous Possibilities Of Digital Learning

The numerous possibilities of digital learning are exploited through theory, multimedia and dynamic content, with suitable combinations of exercises and tests. We support you with all services around digital learning:

- Introduction e-learnings
- Short e-learning nuggets
- Game-based e-learnings
- Animation and explanatory films
- Management statement films
- All print media (posters, flyers, brochures and information sheets etc.)

Our elaborated solutions and tools support all different types of learners.

Structure

The success of a training depends crucially on the motivation of the learners. To reach a very high motivation, we work with the design model ARCS (Attention, Relevance, Confidence, Satisfaction) when developing learning contents and with scenario-based learning.

Scenario-based learning:

- motivates the learners
- allows the learners to directly see the learning rewards
- challenges the learners without overwhelming their mental capacity
- is based on realistic situations
You need a learning platform for your e-learning project? We offer our courses hosted on our learning platform.

Our Learning Centre is flexible and can be used for a variety of training projects. Providing attractive e-learnings, representing the central learning platform of your company or being part in your blended learning approach:

- The TreeSolution Learning Centre has proved itself in manifold scenarios.

- We host your courses maintenance free and ready for use on our servers. You pay only for your usage.

Effective and well-founded training courses

Proven motivational design

Individual and modular programs

Standardized or adapted to your needs

Gamification

Supporting multimedia and printing materials

Easy and fast deployment

Your Key Benefits
At TreeSolution, we know that organization-wide implementation of truly effective information security has to be centered on people. So that you can get your information security to where you need it to be, our actions encompass not just technology, but also people, processes and policies – because the best technical procedures in the world will only work if all the people using them have the right information security awareness, behavior and culture.

Our solutions are based on real information, hard facts and years of painstaking research. We’ve tested and certified every part of the solutions in our catalogue so that you can have complete confidence in what we do. We have a unique focus on the combination of people and technology in information security that sets us apart.
