JOIN US AND DISCOVER HOW BUILDING INFORMATION MODELING (BIM) IS USED WITHIN MANITOBA ARCHITECTURAL, ENGINEERING, CONSTRUCTION AND OWNER COMMUNITY. BE A PART OF THE DISCUSSION, AS WE LOOK AT THE BUSINESS BENEFITS OF BIM AND SOME OF ITS OBSTACLES SUCH AS:

- Who is using BIM in the local eco-system, and why?
- Is BIM increasing business, reducing costs, both, either?
- What are the investments related to an effective BIM implementation, and what is the related payback?
- What is the Owners perspective on BIM? Is BIM a competitive differentiator when bidding on projects, a base requirement to be at the project table, or do they care?
- Which projects are best and least suited to BIM? Find out what to look for and what to avoid in a project as you adopt BIM.
- How is BIM streamlining and complicating collaboration for all stakeholders? How can collaboration be made as effective as possible, and what are the paybacks?
Opening Address: Pietro Ferrari, CanBIM Secretary & Chair Education & Research Committee

Introduction - Derek Kochenash, Dean of Skilled Trades & Technologies, Red River College

Keynote - Innovation and Digital Transformation at Alberta Infrastructure, Rafael Lucero, Manager, Site Geomatics and Building Inventory, Alberta Infrastructure

Architectural Technology Program, Red River College, Chris Urbanski, Program Coordinator, Red River College

Republic Architecture’s BIM Adoption: Designing & Managing Our New Home, Sean Usher, Design Technology Leader, Republic Architecture

Revit Parametric Design and Fabrication, Trent Piazzoni, Project Architect, & Michael Hiebert, Senior Technologist, NumberTEN Architecture

CanBIM Certification - Pietro Ferrari, Chair of Education & Research Committee, CanBIM

True North Square - Utilizing Technology in the Field, David Thompson, VDC Manager, PCL & Paul Shack, Operations Manager, Nor-Tec Group

Panel Discussion - Digitizing Manitoba’s Built Environment: The Role of BIM
