**ENSURE EMPLOYEE HONESTY**

**ISOLATE ASSET LIABILITY**

Your workplace moves at a mile a minute, but **a lost, stolen or inaccessible key or asset can severely inhibit productivity.**

Asset loss is a costly security risk and a major headache, making asset Control an essential provision for any facility with assets in need of safekeeping.

**Ecos Systems** Electronic Key Control systems offer the smart and affordable solution to all your Key or asset Control needs.

Remote-access lets administrators generate audit trails instantly to review and share.

**Know for certain which asset are accessed, when they're accessed, and by whom.**

The ideal storage solution for Fleet and Motor Pool, G.E.M. Facilities, Lodging, Hospitality, Corrections, Property Management and any other asset management need.

## WHAT IS KEY / ASSET CONTROL?

Key / Asset Control refers to any key management system that also protects your keys and assets against loss, theft, duplication or access by an unauthorized user. **Investigating and replacing lost keys and compromised locks is an enormous cost and a stressful risk for any business.** Therefore, a steadfast Key Control system is critical to every facility in which **access to vehicles, specialty tools, lockers, and/or a personal or restricted area needs to be managed with ease and total security.**

Whereas Key Control is traditionally managed on-site by designated staff, **Ecos Systems** automated key cabinet systems give you complete authority over key access from your PC or mobile device. Know with absolute confidence when and by whom your keys and assets are accessed, save huge on loss and replacement costs, and eliminate unnecessary personnel from your payroll

## WHY ELECTRONIC CONTROL?

Electronic Key Control systems are the practical and cost-efficient solution to managing valuable assets at your business. **Why hire additional personnel to manage Key Control when the Ecos Systems Electronic Key Control Cabinet does it faster, better, and at a mere fraction of the cost?**

**Ecos Systems** Electronic Key Control Cabinets are designed for flexibility and integration -providing an intelligent Key Control solution for your specific industry needs. Our modular design are equipped with an ergonomic user-interface, interoperable software and up to 1000 asset per unit. All **Ecos Systems** key management systems are scalable, so you are kept safe and satisfied as your company and security needs evolve.

Our robust electronic key management systems are loaded with cutting edge administrative functions and back-end management tools, **allowing you to remotely manage, track and share all key access activity at any moment you choose.**

Fully automated and effectively maintenance-free, **Ecos Systems** Key Control Cabinets are the smartest way to achieve total key security. Managers who use electronic key management have command over every single key and asset, 24 /7.

An essential service for Government, Educational, and Medical facilities, Motor Pool, Fleet management, Specialty Equipment and Machinery management, Casino and Gaming, Real Estate and Property management, Auto Sales and Rental, Correctional facilities, Healthcare and Retirement facilities, Storage facilities, Corporate Offices and Centers, Control Rooms and Restricted-Access Areas, Lodging and Hospitality, Multi-Family Buildings, Student Housing, and much more!

## HOW THE ECOS SYSTEMS ELECTRONIC KEY CONTROL CABINET WORKS

**Simple. Efficient. Extremely convenient.**

The Electronic Key Control Cabinet permits key access through a variety of user identification Access Control options. **Magnetic stripe reader, barcode reader and PIN code access make it a cinch for the right employee to quickly retrieve the right key.** For maximum security, abolish the risk of identity fraud and password sharing with Multiple Signature and biometric scanner Access Control.

The key cabinet's self-explanatory asset management software is so easy to grasp, your employees will have the new routine down pat with little to no training time required. **To retrieve or return their assigned keys, staff simply input their user credentials and the respective key fob automatically unlock.** It's that straightforward: no more paper receipts to keep track of, no more human error during transactions, no more lost or misplaced keys!

Administrators can instantly create thousands of User ID codes, reserve keys by time and/or user(s), review audit trails, and automatically email or text periodic reports to related parties. **Ecos Systems** Electronic Key Cabinet systems guarantee your absolute control over key access.

**All "loading" and "dispensing" events are recorded with the date, time and user name. You can assess and share these audit trails at any time, either on-site or remotely from your PC or mobile device.** Event data can be imported directly into Excel or other spreadsheet software, so managers can be certain of who had which key, when they accessed it, and for how long.

Our innovative engineering makes installation fast and stress-free. **Ecos Systems** Key Cabinets are operable from any standard outlet in your facility, available with either a wall mount or pedestal mount.

Your security is our highest priority, that's why The **Ecos Systems** Electronic Key Control Cabinet has essential emergency provisions to protect your assets and keep daily operations on track. All key boxes are outfitted with a powder-coated steel door to deny visibility of the key box contents and equipped with an individual electronic door lock mechanism.

**Backup power supply and manual emergency door release allow your staff to continue their work as usual in the event of a power surge or failure.**

## REMOTE ACCESS ASSET MANAGEMENT SOFTWARE

The advanced software in **Ecos Systems** Electronic Control Cabinet provides intuitive data analysis options. Our programming team will assist you on every step of the way to ensure that you are able to reap the full benefits of your remote access software capabilities.

**Our software is interoperable with almost all computer systems you may already employ at your facility**, simplifying set-up and providing prudent flexibility for your business's future expansion. Network connection can be established through Wi-Fi or Ethernet.

Administrators can create thousands of individual User IDs for any given key cabinet system. Security clearance levels are assigned to each user and enforced via your preference of Access Control device. With unlimited interface language settings, every staff member is guaranteed clear and fast access to their assigned asset compartments.

When your staff retrieve and return keys **activity reports are automatically generated at daily, weekly, or monthly intervals to save you valuable time and effort throughout your daily routine.** Audit trails can be imported into Excel or another spreadsheet software as a .CVS file.

**In the event of an unreturned key, self-activating email and text message notifications allow you to identify the responsible employee, resolve the issue and get your staff back to work immediately.**

## EASY TO USE & EASY ON THE EYES

The modern design of **Ecos Systems** electronic key management cabinet is both compact and versatile, optimizing wall space and providing accessibility to all key users. You can mount your key cabinet system directly to the wall to conserve work space or accelerate workflow by securing it on a pedestal in the most advantageous location of your facility.

Built with wear resistant, cold-rolled steel to withstand damage, the resilient Electronic Key Control Cabinet offers protection against attempted theft and tampering. You can rest easy knowing each key is secured behind its own steel, locking door.

The basic, user-friendly interface makes Key Control faster and more intuitive than ever before. **Bright, high-contrast display screens ensure visibility night and day, even in darkly lit areas of your facility.** Available with easy-to-read LCD and/or touch screen monitor display. Promote your business and increase brand visibility by adorning the front panel of your Electronic Key Control Cabinet with customizable vinyl graphics.

## USER IDENTIFICATION OPTIONS

To identify authorized users, **The Electronic Key Control Cabinet can be configured to support any Access Control device you choose**, making accessing keys fast and simple while providing total security against unauthorized access and theft.

To best suit your specific industry needs and security requirements, choose from barcode reader, magnetic stripe, PIN key pad, and/or biometric user identification devices. **Ecos Systems** key management cabinet systems are fully integrable, ensuring compatibility with any Access Control device that your business may demand. Keys in need of heightened security can be protected by Multiple access control, a combination of as many user ID codes and Access Control devices as necessary.

## THE IDEAL SOLUTION FOR ALL ASSET CONTROL

Key Control is an integral service for any business or institution with assets, vehicles, specialty equipment, or restricted areas in need of protection and efficient access management. Additionally, [Key Cabinets aren't just for keys anymore!](#) Whatever your business may be, the Electronic Key Control Cabinet provides the most pragmatic and affordable Key Control solution.
